Ministry of Government Services

Annual Report

Fiscal year ending March 31, 1985

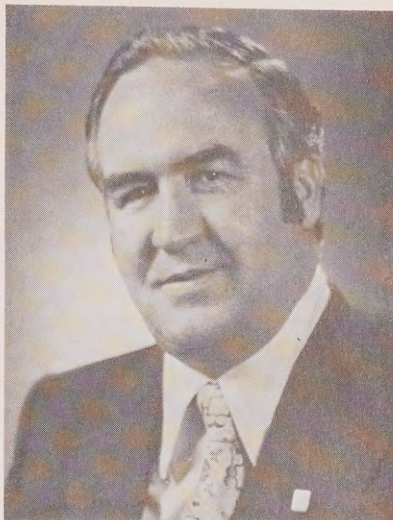

His Honour, The Lieutenant-Governor of The Province of Ontario

MAY IT PLEASE YOUR HONOUR:

I have the privilege of presenting for the information of Your Honour and the Legislative Assembly, the Annual Report of the Ministry of Government Services for the fiscal year beginning April 1, 1972 and ending March 31, 1973.

Respectfully submitted,

JAMES W. SNOW,
Minister.

The Honourable James W. Snow, Minister of Government Services

SIR:

I have the honour to submit for your approval the 1972/73 Annual Report of the Ministry of Government Services.

Respectfully submitted,

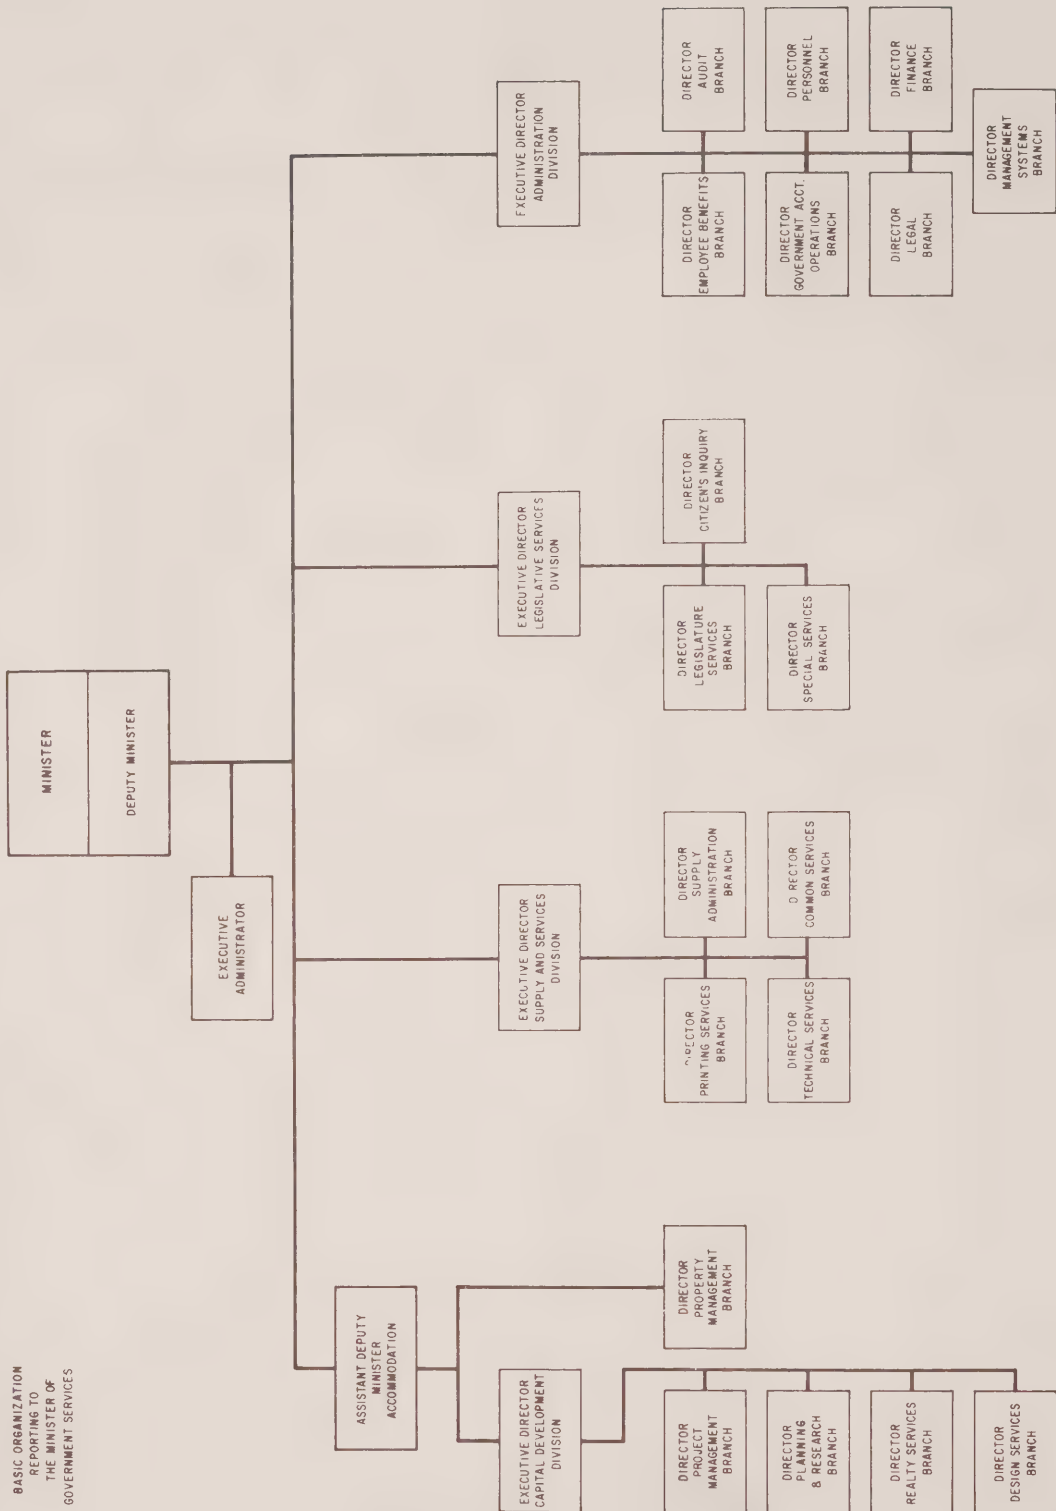

J. C. THATCHER,
Deputy Minister.

MINISTRY OF GOVERNMENT SERVICES

BASIC ORGANIZATION
REPORTING TO
THE MINISTER OF
GOVERNMENT SERVICES

**MINISTRY OF GOVERNMENT SERVICES
COMPARATIVE EXPENDITURES BY PROGRAM
FOR THREE FISCAL YEARS**
(IN \$ MILLIONS)

ADMINISTRATION DIVISION

The Administration Division provides the Ministry with administrative support services and professional expertise in all aspects of the administrative process. In addition, the Division assists other ministries and agencies by providing the operational and management resources required to administer government payments, banking transactions, collections, and employee benefits. The Division has seven Branches — Audit, Employee Benefits, Finance, Government Accounting Operations, Legal, Management Systems and Personnel.

AUDIT BRANCH

The Audit Branch continued to measure and evaluate the accounting, financial and operational controls within the Ministry to ensure effective managerial control.

During the year, the Branch completed the evaluation of the major units of the Ministry for the adequacy of internal control measures in preparation for the planned conversion to a post-audit function for the Ministry.

EMPLOYEE BENEFITS BRANCH

The Employee Benefits Branch combined the services of the Pension Funds Branch and the Group Insurance Section to provide a composite employee benefits program. The Branch is responsible for administering the benefits program for employees in the Ontario Public Service, the Members of the Legislature and a number of boards, agencies and commissions, in accordance with The Public Service Superannuation Act, The Legislative Assembly Retirement Allowances Act and various insurance protection plans.

The Branch is also responsible for the clearing of contributions from all ministries for the Canada Pension Plan, Unemployment Insurance Commission, Ontario Health Insurance Plan, Blue Cross Plan and Extended Health Plan. Additional functions include liaison with insurance underwriters, providing advice and guidance in the planning and formulation of policy for the

combined employee benefits program, and secretarial services for the Public Service Superannuation Board.

FINANCE BRANCH

The Finance Branch is responsible for processing and recording the financial transactions of the Ministry and for providing financial reports on Ministry operations.

A computer-based recording and reporting system was introduced in the Ministry on April 1, 1972. This financial information system (F.I.S.) significantly expanded the capability of the Branch to provide the wide range of financial and financially-oriented reports which management requires to exercise effective control of the operations of the Ministry.

GOVERNMENT ACCOUNTING OPERATIONS BRANCH

The Government Accounting Operations Branch was transferred to the Ministry on April 1, 1972.

The Branch is responsible for the Ontario Government payroll as well as all payments to suppliers for goods and services, payments for family benefits, and payments for grants. It also records revenue and expenditures, reconciles bank account balances, and recovers amounts outstanding for loans or services provided by ministries.

LEGAL BRANCH

The Legal Branch ensures the legality of the Ministry's operations, and services the needs of the various programs in the Ministry.

The Branch also performs such legal functions as are affiliated with the purchase, expropriation, leasing and sale of property; contracts; insurance; Orders-In-Council; claims; drafting of legislation; providing legal opinions; and appearing before administrative tribunals.

MANAGEMENT SYSTEMS BRANCH

This Branch provides support services to management staff in the Ministry relating to computer systems development, systems and procedures studies, records management and forms control.

In addition to a broad range of short-term studies concerned with streamlining operations, the Branch carried out a number of significant studies resulting in longer range management policies and procedures.

PERSONNEL BRANCH

The Branch is organized in four sections: recruitment, job evaluation, staff development and administration.

The total new staff recruited during the year was 1,173. Job evaluation continued to ensure that employees are properly compensated for work performed. A number of employees benefited from staff development activities designed to develop the full potential of employees.

On March 31, 1973, the Ministry had an approved complement of 2,764 and in addition 1,112 employees were employed in the unclassified service.

SUPPLY AND SERVICES DIVISION

The Supply and Services Division provides government ministries and agencies with a variety of services to achieve economy and efficiency in the supply of purchased goods and services as well as certain common services. The Division has four Branches — Supply Administration, Printing Services, Common Services and Technical Services.

SUPPLY ADMINISTRATION BRANCH

This Branch is responsible for purchasing, supply consolidation and standards on a government-wide basis, as well as the operation of the Public Tenders Office as a service to all ministries.

The Purchasing Section handled 6,842 transactions which had a total value of over 6 million dollars. Contracts awarded as a result of 1,238 tender calls totalled in excess of 14 million dollars.

The Supply Consolidation Section conducted studies on common use commodities. Significant savings were achieved by the consolidation of government-wide requirements within selected commodity fields and by utilizing agreements in effect during the fiscal year, through which ministries purchased goods and services worth over 5.3 million dollars and effected an estimated annual saving of 1.3 million dollars. This section also co-ordinated the Ontario Government exhibit at the following annual fairs in the province:

	Participating ministries and agencies
Canadian Lakehead Exhibition	
— Thunder Bay	9
Central Canada Exhibition	
— Ottawa	10
Western Fair — London	10

The Supply Standards Section continued its program to improve government-wide efficiency and economy in the supply area. The program resulted in:

- policy on motor vehicle allocation and utilization;
- integration of a financial and supply management code to identify ministries' expenditures on supplies and equipment;

- publishing supply standards catalogue of items in common use throughout the government, e.g. stationery, office supplies, office furniture and furnishings;
- development and implementation of a Government Vehicle Fleet Management Information System.

PRINTING SERVICES BRANCH

This new Branch, formerly known as the Office of the Queen's Printer and Publisher, is responsible for three activities, namely print procurement, publications and duplicating services.

The Print Procurement Section handles the printing of the Ontario Gazette and Legislative printing, which includes Votes, Bills, Proceedings, Estimates, Public Accounts and Sessional Statutes. The section also provides both a graphic arts advisory service and a procurement service to all ministries.

During the fiscal year —

Number of printing requisitions received from ministries	5,760
Number of printing tenders placed	439
Value of printing orders	\$5,938,852

The Publications Section is responsible for the distribution of Ontario Government publications to the public and to ministries and government agencies. Distribution is made through the Ontario Government Bookstore and the Publications Centre which provides a mail order service.

During the fiscal year —

Total number of publications sold	180,168
Total value of publications sold	\$368,041
Total number of free publications distributed	325,000

The Government Duplicating Service is the only large duplicating facility serving ministries in the Queen's Park area. The volume of production increased from 109 million copies to 121 million copies for a total sales value of \$1,236,000.

COMMON SERVICES BRANCH

This Branch is responsible for five activities, all of which make services available to all ministries and agencies.

The Government Assets Disposal Section has the responsibility for receipt, storage and disposal of all equipment and furniture declared surplus by ministries. Surplus items are re-issued for use within government, or disposed of by public tender. The sale of surplus items to the public amounted to \$100,747 during the fiscal year.

The Government Mail Service handles most of the government mail for Queen's Park offices and provides a scheduled delivery service for mail, stationery and printing to 119 government offices in Toronto. In addition, a mass mailing service operates high speed folding, addressing, inserting, sealing and metering services. Several million pieces of mass mail were processed during the fiscal year.

The Government Stationery Service is the main supply centre for common stationery and office supplies used by government offices in the Queen's Park area.

During the fiscal year —

Number of items requisitioned	178,204
Value of items shipped from stock	\$1,529,847

Since purchases are tendered on the basis of annual government requirements, the total volume resulted in increased percentage discounts that benefited all ministries.

The Government Telephone Service is responsible for leasing and procuring suitable telephone systems for government use. This section operates a Centrex Telephone system and inter-city Telpak network, which provide two-way toll free calling between Queen's Park and 183 locations throughout the province. On a typical day the switchboard operators handled approximately 15,000 calls, and approximately 120,000 direct-in-dialing calls were automatically dealt with by the centrex system. The production of the Ontario Government Telephone Directory and the insertion of government listings in commercial telephone directories are also arranged by this section.

The Vehicle Repair and Trucking Section carries out repair and maintenance work on 176 ministry vehicles and offers a similar service to other ministries. It provides a trucking service to all ministries and conducts a safety program for Ministry of Government Services vehicle operators.

TECHNICAL SERVICES BRANCH

During the year the Technical Services Branch provided special services in support of the government's supply program. These services included the development of long range planning to meet future supply needs and the provision of expertise in the areas of materials management, warehousing, inventory control and distribution. Additional support services to the Ministry were maintained in the areas of supply research and development and value analysis.

LEGISLATIVE SERVICES DIVISION

The Legislative Services Division was established in April 1972, to provide supporting services to the Legislative Assembly. The Division provides certain informational services to ensure adequate support for the Members of the Assembly, as well as easier citizen access to the government. The Division has three Branches — Citizens' Inquiry, Legislature Services and Special Services.

CITIZENS' INQUIRY BRANCH

This program was designed to make the Ontario Government more responsive to requests from individual citizens who may have difficulty in obtaining government information or assistance. It supplements the existing channels of communication between citizens and government.

The Branch dealt with approximately 16,000 inquiries during the year and in addition produced an improved and expanded information package for distribution to approximately 40,000 school children and others who visit Queen's Park each year.

LEGISLATURE SERVICES BRANCH

The Legislature Services Branch is responsible for the provision of efficient and expeditious service to the Lieutenant-Governor, the Government of the Province, the Office of the Speaker, Members of the Legislature, the Legislative Library, the Press Gallery and visitors to the Legislative Building.

The Information and Tour Guides conducted 1,517 tours of the Legislative Building, consisting of 48,924 people. In addition, 8,017 individual visitors to the Legislative Building were received and provided with information.

The Branch is also responsible for the house-keeping and general maintenance of approximately 500,000 square feet of space in the Legislative Building.

SPECIAL SERVICES BRANCH

The Special Services Branch was established in April of 1972, and renders services such as the Legislative Library, Protocol, Press Clipping, Translation and Media Studio.

The Legislative Library, established primarily for the convenience of Members of the Legislature, is also used by civil servants and the public. It has records which are not available from any other source and during the year handled 11,672 inquiries.

The Protocol Section assists ministries, boards and commissions in matters of protocol, hospitality functions and official visits. Official government documents processed by this Section included Land Patents, Scrolls, Commissioners' Certificates and Certificates of Queen's Counsel, Notaries Public and Justices of the Peace. A total of 17,200 official documents were processed during the year.

The Press Clipping Service provides press clippings to Members, ministries, boards and commissions. During the year approximately 150,000 copies of clippings were distributed.

The Translation Service offers translations in 53 languages to ministries and agencies, as well as visiting officials and recent immigrants. During the year the Section translated 7,707,879 words.

The Media Studio is a modern communications centre which is used extensively by Members, ministries and the Legislative Press Gallery. The studio facilities are used for network interviews, production of films and audio-visual recordings.

CAPITAL DEVELOPMENT DIVISION

The Capital Development Division is responsible for the planning, design, construction, major alterations, and realty services required to provide accommodation facilities for the Ontario Government. The Division has four Branches — Planning and Research, Design Services, Project Management and Realty Services.

PLANNING AND RESEARCH BRANCH

The Planning and Research Branch is responsible for the overall planning and allocation of government space to ministries.

In response to the overall restructuring of government, a Toronto Space Masterplan was developed in concert with ministries and central agencies. All ministries were surveyed and space holdings inventoried for use in a computerized system for space allocation.

Approximately 400 requests for additional office space were reviewed during the year and special planning assistance was provided to ministries in the overall realignment of regional administrative organizations.

In addition, long term accommodation plans were developed for several consolidated office buildings in the province.

A number of studies were completed which initiated revised policies related to government parking, office landscaping, expansion space and space quantity standards.

PROJECT MANAGEMENT BRANCH

The Project Management Branch is responsible for the management of all major accommodation projects in terms of time, cost and client satisfaction. The Branch serves as the prime liaison with client ministries on all major accommodation projects, and in addition is responsible for the management of funds for major capital, new lease, lease-back and accommodation alteration programs. The Branch works with and co-ordinates the various resource branches of the division such as Planning and Research, Design Services and Realty Services,

to provide an effective accommodation service to the various ministries of the government.

DESIGN SERVICES BRANCH

This Branch is responsible for the control of all phases of architectural and engineering design, construction, and provision of furniture and equipment for all major accommodation projects for ministries. Design consulting services are provided for other ministries as may be required, and for Government Services.

During the fiscal year there were 47 major projects in various stages of construction, which represented a total expenditure of \$57,873,000. In addition, 152 minor projects were completed for a total expenditure of \$3,500,000, and approximately 200 new projects were at different stages of study and design.

Construction of the Maplehurst Facilities for Adult Offenders in Milton was commenced for the Ministry of Correctional Services. The first phase of developing Bronte Creek Provincial Park in Mississauga was also started for the Ministry of Natural Resources, including the entrance building, washrooms and three picnic pavilions.

Projects completed during the fiscal year included Queen's Park landscaping, and construction of the Norfolk County Court House and Registry Office, Simcoe; and for the Ministry of Correctional Services, new dormitories were completed at Burtch and Thunder Bay Adult Training and Correctional Centres, and at the Brookside School, Cobourg.

The stone cleaning and restoration of the Legislative Building, Queen's Park, were also completed, as well as new cottages for the Ministry of Health at Thistletown Regional Centre for Children and Adolescents, Rexdale. Construction work on the Children's Village at Ontario Place and a reception centre at Hill Island were completed for the Ministry of Industry and Tourism.

Ministry of Natural Resources projects completed were a forest station at Thunder Bay, an aircraft hangar at Sault Ste. Marie and renovations to the Chief Ranger's headquarters, Pembroke; and

the Thunder Bay Regional and District Office was completed for the Ministry of Transportation and Communications.

Work continued on the Centre of Forensic Sciences, Grosvenor Street, Toronto, for the Ministry of the Solicitor General.

REALTY SERVICES BRANCH

This Branch provides realty services for most government ministries, including the Ministry of Government Services accommodation program which involves the appraisal, negotiation and acquisition of land and buildings, as well as leasing of office space and sale of surplus properties.

During the year 889 property transactions were completed, with a total value of over 61 million dollars.

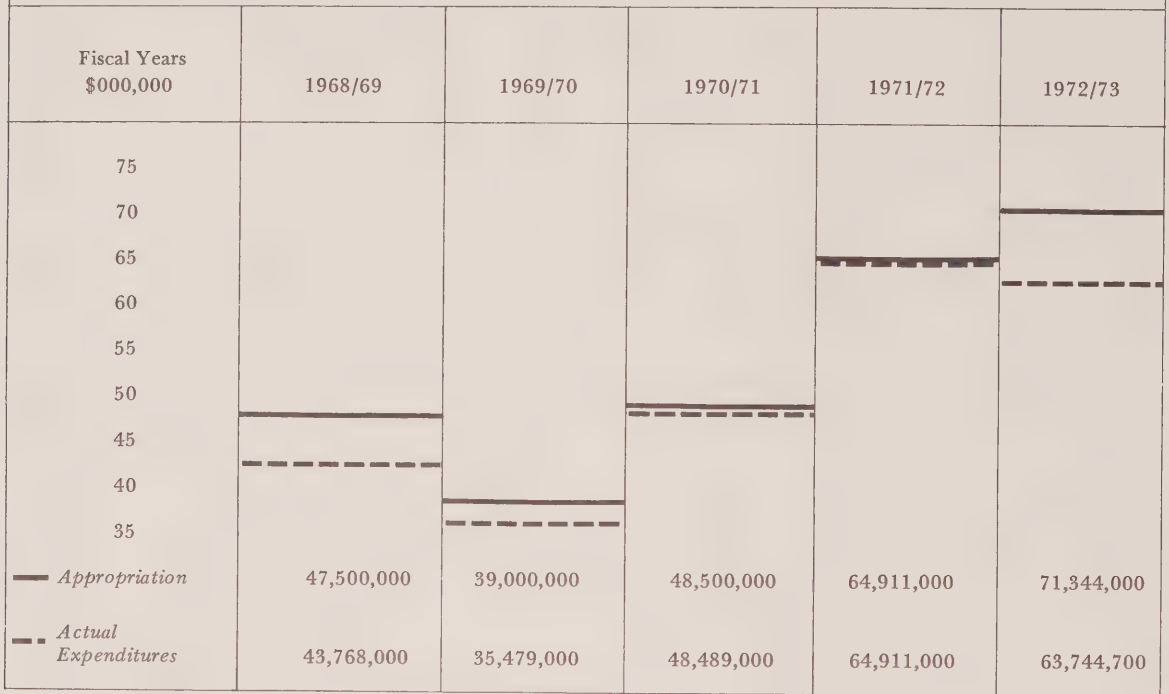

The following summary indicates the transactions completed by the Branch during the year:

Leases	408	1,372,504 sq. ft.	\$37,847,017
Purchases	323	22,528 acres	15,055,461
Appraisals	49	11,687 acres	3,217,971
Sales	50	115 acres	1,738,915
Management Leases	59	Properties	3,172,850
	889		\$61,032,214

Other	0.1	44,900
TOTAL	100.0	<u>\$57,873,500</u>

FIG. 2 -- MAJOR AND MINOR CAPITAL EXPENDITURES

PROPERTY MANAGEMENT BRANCH

INFORMATION SECTION

PROPERTY MANAGEMENT BRANCH

The Property Management Branch is responsible for operational maintenance and repair services to government-owned buildings.

These services are provided through five regional and 16 district offices located throughout the province and include heating, lighting, air-conditioning, cleaning, security and grounds maintenance.

In addition the Branch is responsible for alterations and improvements to both leased and government-owned buildings.

Other services include the administration of the Ministry's safety program to ensure safe conditions in government buildings and on new building construction sites, co-ordination of government employees' parking, and the physical moving of ministries to new locations.

The total expenditure for all services was \$34,017,000 for the fiscal year.

The Information Section, reporting to the Deputy Minister through the Executive Administrator, supplied public relations and information services to other ministries, the news media and the people of Ontario.

While inquiries of a general nature, formerly dealt with or referred by the Information Section, were received in increasing numbers by the newly established Citizens' Inquiry Branch, many requests for information regarding Government Services continued to be satisfied directly by the Information Section. Close liaison was maintained with the Citizens' Inquiry Branch for channelling other inquiries to the appropriate branches of ministries and agencies throughout the government.

Ninety-five news releases on ministry operations were researched, produced and distributed, and written speeches were prepared for senior officials as required.

In its seventh year of publication, the title of the Ministry's quarterly magazine, "Round The Works", was changed to "Spectrum". One issue of "Round The Works" and three of "Spectrum" were produced, keeping Ministry employees and key personnel across government progressively informed on organizational changes, personnel appointments and activities within the Ministry.

Materials and services for official openings of new buildings and photographic services were provided when required.

MINISTRY OF GOVERNMENT SERVICES

BASIC ORGANIZATION
REPORTING TO
THE MINISTER OF
GOVERNMENT SERVICES
MARCH 31, 1974

* Legal Services provided by the Ministry of the Attorney General

Ministry of Government Services Comparative Expenditures by Program for Three Fiscal Years (in \$ Millions)

Administration Division

The Administration Division provides the Ministry with administrative support services and professional expertise in all aspects of the administrative process. The Division is comprised of three Branches — Audit, Finance, and Personnel — and is responsible for providing administrative direction to the Legal Branch. In addition an Office Services function was formally established in the latter part of the fiscal year.

Audit Branch

The Audit Branch is responsible for providing management with objective assessments of the financial and internal controls under which Ministry programs and activities operate.

The Branch performed a significant number of financial audits during the year as part of a multi-year program to cover all major activities in the Ministry. The Branch also provided special audit services, as requested by senior management within the Ministry.

Finance Branch

The Finance Branch processes and records the financial transactions of the Ministry and provides financial reports on Ministry operations.

During the fiscal year, the Branch continued to develop its capacity to provide supporting financial services necessary to further the Ministry's efforts to introduce more effective forms of performance measurements.

Personnel Branch

This Branch is organized into four sections: recruitment, job evaluation, staff development and administration.

The total number of new staff recruited during the year was 405. Job evaluations continued to ensure that employees were properly compensated for work performed. A number of employees benefited from staff development activities designed to develop their full potential.

On March 31, 1974, the Ministry had an approved complement of 2,915 and in addition 1,592 employees were employed in the unclassified service.

Legal Branch

The Legal Branch was transferred to the Ministry of the Attorney General during the fiscal year, but for administrative purposes continues to report to the Administration Division.

This Branch ensures the legality of the Ministry's operations and services the needs of its various programs. It also performs such legal functions as are affiliated with the purchase, expropriation, leasing and sale of property; contracts; collections; Orders-In-Council; claims; drafting of legislation; providing legal opinions; appearing before administrative courts and tribunals.

Office Services Section

This Section is responsible for the Ministry's records and forms management activities, and for providing general administrative services to support Ministry programs.

Supply and Services

The Supply and Services Program provides a diverse range of centralized services and facilities to achieve efficiency and economy in the supply of purchased goods and services, as well as certain common services.

Organization of the Program, with ten Branches and three specialized units grouped into two Divisions — Marketed Services and General Services — is the result of a complete reorganization of Supply and Services in November 1973.

Marketed Services Division

The prime responsibility of the Marketed Services Division is to provide supply services to ministries and agencies in competition with alternative sources of supply in the private sector. The Division also provides certain specialized support services on a government-wide basis.

The Division is comprised of four Branches — Printing Services, Supply Administration, Special Services and Technical Services.

Printing Services Branch

This Branch is responsible for four activities — print procurement, publications, duplicating and stationery services.

The Print Procurement Section purchases printing from the private sector and is responsible for the Visual Identity Program, the publishing of the Ontario Government Telephone Directory and contracting for all Legislative printing.

During the fiscal year —	
Number of requisitions received from ministries	5,770
Number of printing tenders placed	900
Value of printing orders	\$6,550,000

The Publications Service distributes Ontario Government publications to ministries, agencies and the public through the Ontario Government Bookstores, the Publications Centre and through a province-wide library depository system.

During the fiscal year —	
Number of publications sold	235,500 copies
Value of publications sold	\$411,637
Number of free publications distributed	680,750 copies

Additional activities during the year included production of the first annual Publications Catalogue and expansion of the Ontario Government Publications Monthly Checklist.

The Government Duplicating Service is the only large duplicating facility serving ministries in the Queen's Park area. The volume of production during the year was 107 million copies for a total sales value of \$1,200,000.

The Government Stationery Service is the main supply centre for some 1,600 individual stationery and office supplies used by government offices in Queen's Park and throughout Ontario.

During the fiscal year —	
Number of items requisitioned	184,230
Value of items shipped from stock	\$2,155,600

Since purchases are tendered on the basis of annual government requirements, the total volume resulted in increased percentage discounts that benefited all ministries.

Supply Administration Branch

This Branch is responsible for purchasing, supply consolidation and supply standards on a government-wide basis, as well as the operation of the Public Tenders Office and the Government Assets Disposal Service.

The Purchasing Section handled 8,136 transactions during the year, representing a total value of 6.5 million dollars.

The Supply Consolidation Section, through research and evaluation of commonly-used items in government, effected 95 Collective Purchasing Agreements during the year. As of March 31, 1974, cumulative purchases from these agreements totalled over

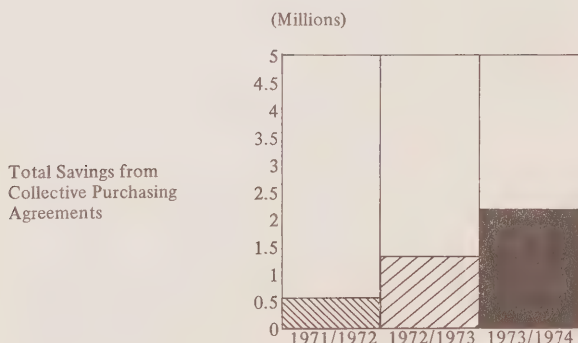

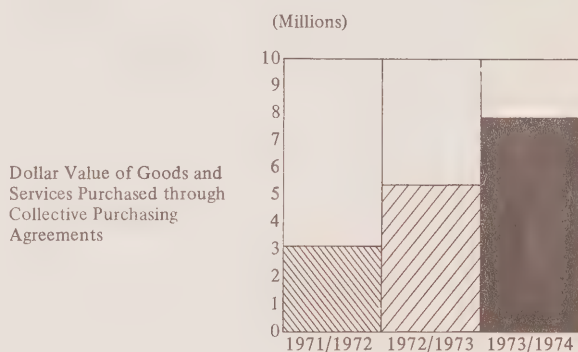

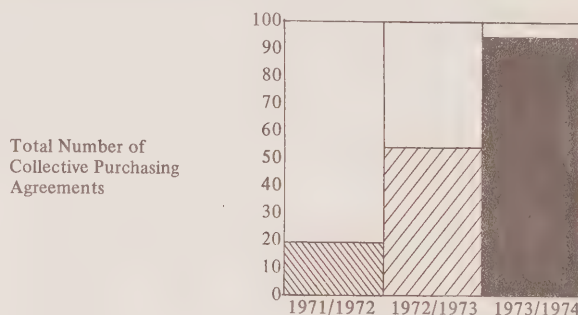

7.8 million dollars resulting in an estimated cost saving of 2.2 million dollars.

The Supply Standards Section continued to participate with other ministries in the standardization of government supply operations through the development and use of standard specifications, identification, reporting and control procedures.

The Public Tenders Office provides a central tendering service to ministries and agencies to ensure fair competition in the awarding of government contracts. In the 1973/74 fiscal year, this office processed contracts in various categories totalling 27.5 million dollars. These included capital construction contracts with a total value of 16 million dollars.

The Government Assets Disposal Service is responsible for the receipt, storage and disposal of all equipment and furniture declared surplus by ministries. Surplus items are either re-allocated to requesting ministries or agencies, or disposed of by public tender. The sale of surplus items to the public amounted to approximately \$300,000 during the fiscal year.

Supply Consolidation — Collective Purchasing Agreements

Special Services Branch

This Branch is responsible for five activities, all of which make services available to all ministries and agencies.

The Government Mail Service handles most of the government mail for Queen's Park offices and provides a scheduled delivery service of mail, stationery and printing to 119 government offices in Toronto. Mass mailing services for large volume mailings include high speed folding, addressing, inserting, sealing and metering.

During the fiscal year —	
Pieces of mass mail processed	20,893,300
Pieces of incoming mail sorted	10,695,000

In addition, approximately 285,000 addresses of government mail recipients were adjusted to reflect the new Postal Code.

Central Collection Services continued to provide assistance to all ministries in the collection of overdue accounts.

During the fiscal year —	
Number of accounts for collection	2,995
Dollar value of outstanding accounts	\$2,978,000
Dollar value of collections made	\$ 615,000

The Press Clipping Service provided press clippings to Members of the Legislature, ministries, boards and commissions. A total of 195,000 clippings were distributed during the year representing an increase in volume of 30% compared to the previous year.

The Translation Service, covering 53 languages, primarily serves ministries and agencies of the Government and Members of the Legislature. It also translates, free of charge, education and trade certificates for Ontario immigrants and in special cases provides interpreters during visits of foreign dignitaries. During the year the demand for these services continued to increase.

The Vehicle Repair and Trucking Section carries out repair and maintenance work on Ministry vehicles and equipment and offers a similar service to other

ministries. This Section also provides a trucking service to all ministries and conducts a safety program for Ministry of Government Services vehicle operators.

Technical Services Branch

The Technical Services Branch provides special services to assist in the achievement of economy and efficiency in the supply of purchased goods and services to ministries and agencies. During the fiscal year, the Branch adopted a project-oriented approach to its services and some 40 projects were undertaken involving problem-solving and productivity improvement.

The Supply Research and Development Section developed performance indices for Branches of the Marketed Services Division and dealt with issues in the areas of tendering, purchasing and printing, which resulted in substantial savings.

The Materials Management Services Section completed a number of projects, primarily to achieve savings and improve operational efficiency in the telephone and stationery services.

General Services Division

The General Services Division provides services of a corporate support nature to the daily operations of ministries, agencies and members of the Legislative Assembly. Other services of the Division help promote greater contact between citizens and the Government of Ontario.

The Division consists of six Branches, as well as three specialized service units — The Legislative Library, The Protocol Office, and Insurance and Risk Management.

Legislative Services Branch

The Legislative Services Branch provides efficient and expeditious housekeeping, maintenance and support services to the Lieutenant-Governor, the Government of the Province, the Office of the Speaker, Members of the Legislature, the Legislative Library, the Press Gallery, the Media Studio and visitors to the Legislative Building.

The Information and Tour Guides conducted 1,636 tours of the Legislative Building consisting of 42,986 people, primarily schoolchildren. In addition, 8,343 individual visitors to the Legislative Building were received and some 28,000 general inquiries were handled on subjects such as history, places of interest, vacation opportunities and transportation directions.

Employee Benefits Branch

The Employee Benefits Branch administers a benefits program for Members of the Legislature, employees in the Ontario Public Service, and certain designated agencies, boards and commissions, in accordance with the Legislative Assembly Retirement Allowances Act, the Public Service Superannuation Act and various insurance protection plans. The Branch is also responsible for the clearing of contributions from all ministries for the Canada Pension Plan, Unemployment Insurance Commission, Ontario Health Insurance Plan, Blue Cross Plan and Extended Health Plan. Additional functions include liaison with insurance underwriters, providing advice and guidance in the planning and formulation of policy for the combined benefits program, and secretarial services for the Public Service Superannuation Board.

During the fiscal year, a new method was initiated to have the Public Service Superannuation Fund comply with an annual graduated scale so that interest credited to the Fund will relate more closely to current long-term provincial bonds.

Government Accounting Branch

This Branch is responsible for the Ontario Government payroll, as well as processing all payments to suppliers for goods and services, payments for family benefits and payments for grants. The Branch also records revenue and expenditure and reconciles bank account balances.

During the year, 5,104,000 cheques were produced by the Branch under categories such as accounts payable, government payroll, bond interest payments, welfare payments and student loans. In addition, a study was completed in the latter part of the fiscal year to determine the need for replacement of certain pieces of operating equipment to ensure a continuing efficiency in Branch production capability.

Records Services Branch

The Records Services Branch was transferred to the Ministry on November 1, 1973, from the Archives of Ontario, Ministry of Colleges and Universities.

This Branch provides advice and assistance to all ministries and agencies concerning records and forms management, forms design, records scheduling, micro-recording and the development of file classification plans and technical systems.

In addition, the Branch provides storage facilities for inactive hard copy records, vital records, micro-film security copies and automatic data processing security copy tapes, at the Records Centre located in Mississauga. The Branch also maintains liaison with the Archives of Ontario to ensure that records with long-term research significance or those which relate to the history of Ontario are safeguarded.

During the fiscal year, savings from the basic records management activity, which includes the conservation of space, recovery of equipment, improved retrieval time and those activities where economic factors have been established, amounted to \$772,000. Forms activity of the Branch resulted in an additional saving of \$132,166 in procurement costs as well as reductions in processing time.

The following table refers to activities of the Records Centre for the fiscal year:

Records Centre holdings	124,401 cu. ft.
Records destroyed	29,175 cu. ft.
Records transferred to Archives of Ontario	4,135 cu. ft.

Telecommunication Services Branch

Telecommunication Services Branch was created January 28, 1974 from a merger of the Internal Communication Systems Branch and Government Telephone Services.

The Branch offers a complete range of consulting and operational telecommunication services for ministries and agencies which include telephone, data communication, teletype, radio, paging, intercom, image transmission, satellite and other communication modes.

Common services operated by the Branch include a Centrex Telephone system and Inter City Network which provide two-way toll free calling between Queen's Park and major government facilities throughout Ontario. On a typical day, the switchboard operators handled approximately 17,000 calls, and approximately 130,000 direct-in-dialing calls were automatically dealt with by the Centrex system.

Citizens' Inquiry Branch

The Citizens' Inquiry Branch assists in making the Ontario Government more responsive to requests from individual citizens who may have difficulty in obtaining government information or assistance. The Branch supplements the existing channels of communication between citizens and government.

The Branch dealt with approximately 16,000 inquiries during the year, and continued to provide a package of information about the provincial government for distribution to visitors of the Legislative Building. In addition, the Branch developed plans for the publication of an index of government programs and services.

The Protocol Office

The Protocol Office assists ministries and agencies in matters of protocol, hospitality functions, official visits, formal government ceremonies and special events, and liaison with foreign consular posts.

The office also records and microfilms all official documents issued under the Great Seal of Ontario, the Privy Seal of the Lieutenant Governor and the Ministry of Government Services Seal. It prepares congratulatory scrolls for Ontario citizens in recognition of ninetieth or succeeding birthdays and fiftieth or succeeding wedding anniversaries, as well as for significant individual accomplishment and for special jubilees.

During the year, the Protocol Office participated in arrangements for the visit of Her Majesty the Queen and His Royal Highness The Duke of Edinburgh; the Office also arranged for two state visits, six ministerial visits and eleven ambassadorial visits.

A total of 21,940 official documents were processed during the year, while 6,362 congratulatory scrolls were presented to Ontario citizens.

Legislative Library

The Legislative Library, established primarily for the convenience of members of the Legislature, is also used by caucus research staff, the Legislative Press Gallery and the public. The Library contains approximately 140,000 bound volumes, a law collection of approximately 12,000 volumes, and is a full depository for United States and Canadian Federal Government publications and Ontario Government publications. In addition, the Library holds basic legislative publications from other provinces and displays 230 Ontario daily and weekly newspapers, representative newspapers from the provincial capitals and some major newspapers from outside Canada.

The Library handled approximately 11,500 inquiries during the year.

Insurance and Risk Management

The Insurance and Risk Management Unit was established within the Division in the latter part of the fiscal year, and provides ministries and agencies with expertise to develop, implement and maintain insurance and risk management programs. This unit is expected to become fully operational in the next fiscal year.

Management and Information Services

The Management and Information Services Program was established in April 1973, in response to recommendations of the Committee on Government Productivity. The Program provides the Ontario Government with a common source for management consulting, information systems design, and computer programming and processing services.

Program activities during the fiscal year included recruiting executive staff, transferring personnel from other areas of Government and consolidating services. In addition, plans were developed in preparation for providing services on a charge-back basis, in competition with the private sector.

The Program was organized into three Divisions by the end of the fiscal year — Management Consulting Services, Computer Services and Systems Development Services.

Management Consulting Services Division

The Management Consulting Services Division was created from the four Branches of the Management Services Division, after the transfer of that Division from Management Board Secretariat to the Ministry of Government Services at the start of the fiscal year. The Division provides ministries and agencies with management consulting resources which are comparable to those of management consulting firms in the private sector.

During the fiscal year, the Division further developed and strengthened its service role to ensure that its various services would be provided to all areas of government.

The four Branches of this Division are Organization and Methods Services, Information Systems, Management Science and Actuarial Services.

Organization and Methods Services Branch

The Organization and Methods Services Branch provides services designed to improve the organizational structures and administrative procedures of ministries. The Branch conducts feasibility studies, system analysis and design, cost/benefit analysis, and develops implementation plans.

Information Systems Branch

This Branch provides various consulting services to assist in determining the overall information needs of a ministry or agency. These services include defining management decision processes, identifying information that can be used to aid the decision process, and developing related concepts and frameworks for manual or computer systems. Branch personnel also assist in researching and preparing policy papers, co-ordinating and preparing multi-year plans — and act as project managers for the installation of new information systems.

Management Science Branch

The prime responsibility of the Management Science Branch is to assist ministries and agencies in determining the most desirable solutions to large scale management problems. The Branch conducts operations research projects in areas such as resource allocation, inventory management, forecasting and physical distribution, and provides technical advice on modelling, applied mathematics, statistics and survey methodology.

Actuarial Services Branch

The Actuarial Services Branch provides services related to the future payment of monies based on contingencies such as sickness, death and retirement. The Branch provides advice regarding costs and benefits of a variety of pension plans, group insurance plans or other risk-sharing arrangements. Additional services include population projections, estimates of revenue effects of tax changes, and calculation of investment yields.

Systems Development Services Division

The Systems Development Services Division was established to provide a variety of services to ministries and agencies relating to the direct implementation of manual or computer information systems. The Division offers systems analysis and design, computer programming, project management and program

maintenance services. The Division also assists clients in acquiring more specialized technical capabilities from private sector consulting and programming firms, and, when necessary, arranges training courses for client ministry staff on subjects related to Division operations.

During the fiscal year considerable progress was achieved in organizing the Division, and project direction was provided to ministries and agencies. Other organizational activities included the recruitment of executive staff and the transfer of the majority of systems and programming personnel from other Government ministries, with the exception of the Ministries of Transportation and Communications, Education and Health. In addition, a Support Services Branch was created to provide future technical and personnel support for Division staff engaged in project activities.

Computer Services Division

The Computer Services Division was established to provide computer processing services to ministries and agencies of the Ontario Government.

Organization of this Division commenced at the beginning of the fiscal year, following the transfer of the Computer Services Centre from the Ministry of Treasury, Economics and Intergovernmental Affairs to the Ministry of Government Services. This facility was renamed the Central Computing Branch and continued to provide data processing services to a variety of ministries. Other organizational activities included the recruitment of executive staff for the Division, and the development of a computer integration plan to consolidate data processing facilities of the Ontario Government, as recommended by the Committee on Government Productivity. Also, a Computer Systems Planning Branch was established during the year to provide a future source for services planning as well as computer technology support services.

Management Planning Branch

The Management Planning Branch was established in November 1973, as part of the major reorganization of the Ministry.

The Branch is responsible for the development and support of the Ministry's corporate planning and control system, and also provides executive assistance to the Deputy Minister.

Major activities of the Branch include the preparation of the Ministry's Multi-Year Plan, continuing analysis of Program activities to ensure consistency with Government policy and Ministry goals and objectives, and Ministry liaison with Management Board Secretariat concerning policies and program proposals. The Branch also develops and arranges for the publication of Ministry policies and procedures, and provides public relations and information services to other ministries, the news media and the public.

During the year a Multi-Year Plan for Ministry programs was developed for implementation in the

1974/75 fiscal year. In addition, a number of proposals were prepared and submitted for Management Board approval and Ministry policies and procedures were developed for the guidance of managers in the Ministry.

The Branch co-ordinated the implementation of a major reorganization of the Ministry effective November 1, 1973, which was designed to provide an organizational structure to effectively carry out the role of providing service on a government-wide basis.

Three issues of the Ministry's publication, "Spectrum" were produced during the year, keeping employees progressively informed on Ministry activities and 113 news releases were produced and distributed.

The Branch continued to provide executive assistance to the Deputy Minister on a variety of matters during the year.

Accommodation

The Accommodation Program provides accommodation facilities for ministries and agencies of the Ontario Government. This objective is achieved through the provision of a comprehensive range of related services by the four Branches of the Capital Development Division, and by the Property Management Branch.

Capital Development Division

The Capital Development Division is responsible for the planning, design, construction, major alterations and realty services required to provide accommodation facilities for the Ontario Government. The Division has four branches — Planning and Research, Design Services, Project Management and Realty Services.

Planning and Research Branch

The Planning and Research Branch is responsible for long-term government accommodation planning, and for allocating government space to ministries.

In response to the overall restructuring and decentralization of various ministries resulting from the Committee on Government Productivity recommendations, accommodation changes were implemented for the head office organizations of six ministries. Decentralization of government programs created a demand for accommodation facilities in numerous regional and district centres. As a result, feasibility studies and long-term accommodation plans for new consolidated buildings were developed for Sault Ste. Marie, Hamilton, Kenora and Dryden. In addition, accommodation plans were updated for Timmins, Sudbury and Windsor.

During the year, the Branch developed a computerized mathematical model to facilitate acquisition of accommodation through financial comparison of lease, leaseback and capital construction alternatives.

Other activities included reviewing requests for office space, surveying ministries for possible utilization of surplus land, and developing new ministerial space standards in co-operation with the Committee on the Working Environment.

Design Services Branch

This Branch is responsible for the control of all phases of architectural and engineering design, construction supervision, and provision of furniture and equipment for all major accommodation projects of ministries. Design consulting services are provided for other ministries as required, as well as for the Ministry of Government Services.

There were 52 major projects in various stages of construction during the fiscal year, which represented a total expenditure of \$55,107,100. In addition, 150 minor projects were completed for a total expenditure of \$6,184,000. Approximately 290 new projects were undertaken and progressed through various stages of study and design.

Ministry of Correctional Services projects undertaken in the fiscal year included kitchen and dining facilities for the Adult Training and Correctional Centres at Burtch and Thunder Bay, the Adult Training Centre in Brampton, the Brookside School in Cobourg; and renovations to the Scarborough Municipal Building to provide new administrative offices for the Ministry of Correctional Services. Projects completed for the Ministry included the Ontario Correctional Institute and dormitories at the Adult Training Centre in Brampton, staff living quarters at the Burwash Correctional Centre, and additions and alterations to the Kenora Jail.

Construction projects for the Ministry of Health included the Ortona facilities for the retarded in Oakville and a Trades Building at the Lakeshore Psychiatric Hospital in New Toronto. Renovations to the Caen Court and the Assembly Hall at Prince Edward Heights, Picton were started as were improvements to roads, parking areas, sidewalks and sewers. Renovations to the recreation centre and kitchen, and a boiler installation were also completed at Prince Edward Heights, Picton.

Projects for the Ministry of Transportation and Communications included construction of a District Repair Garage in Port Hope and a Materials Testing Laboratory in Thunder Bay. In addition, construction of a District Repair Garage and Service Building was completed in North Bay.

The Laboratory Building in Etobicoke was completed for the Ministry of the Environment, while alterations were completed at Osgoode Hall in

Toronto, and in the basement of the Legislative Building.

Project Management Branch

The Project Management Branch is responsible for the management of all major accommodation projects in terms of time, cost and client satisfaction. The Branch serves as the prime liaison with client ministries on all major accommodation projects and is responsible for the management of funds for major capital, new lease, leaseback and accommodation alteration projects. The Branch also works with and co-ordinates the various resource branches of the Division, i.e., Planning and Research, Design Services and Realty Services, to provide an effective accommodation service to the various ministries of the government.

Realty Services Branch

This Branch provides realty services for most government ministries, including the Ministry of Government Services accommodation program which involves the appraisal, negotiation and acquisition of land and buildings, as well as the leasing of office space and disposing of surplus properties. In addition, the Branch provides an advisory service to Boards, Commissions and Crown Agencies on real estate matters.

During the year 1,490 property transactions were completed, with a total value of over 90 million dollars.

The following summary indicates the transactions completed by the Branch during the year:

Leases	455	1,144,398 sq. ft.	\$ 30,832,415
Purchases	335	26,177 acres	20,311,977
Appraisals	69	1,913 acres	26,175,425
Perquisite Appraisals	455	houses	10,576,704
Sales	55	927 acres	1,183,305
Management Leases	121	properties	1,027,429
	1490		\$ 90,107,255

Summary of Major Capital Expenditures, 1973/74

Property Management Branch

The Property Management Branch is responsible for operational maintenance and repair services to government-owned buildings.

These services are provided through twelve Regional and four Field Area offices which were established following reorganization of the Branch on April 1, 1973. Services include heating, lighting, air conditioning, cleaning, security and grounds maintenance.

In addition, the Branch is responsible for alterations and improvements to both leased and government-owned buildings.

Other services include the administration of the Ministry's safety program to ensure safe conditions in government buildings and on new building construction sites, co-ordination of government employees' parking, the physical moving of ministries to new locations, and co-ordination of displays by various ministries at the London, Ottawa and Thunder Bay exhibitions.

The total expenditure for all services in the 1973/74 fiscal year was \$39,350,000.

Tenders received and contracts awarded for Capital Construction Projects over \$50,000

Annual Report of the Ministry of Government Services

Fiscal year ending March 31st, 1976

Annual Report of the Ministry of Government Services

Fiscal year ending March 31st, 1976

Ministry of
Government
Services

*To Her Honour, The Lieutenant-Governor of
The Province of Ontario*

MAY IT PLEASE YOUR HONOUR:

I have the privilege of presenting for the information of
Your Honour and the Legislative Assembly, the Annual
Report of the Ministry of Government Services for the
fiscal year beginning April 1, 1975 and ending March
31, 1976.

Respectfully submitted,

Margaret Scrivener.

MARGARET SCRIVENER,
Minister.

*The Honourable Margaret Scrivener,
Minister of Government Services*

MADAM MINISTER:

I have the honour to submit for your approval the
1975/76 Annual Report of the Ministry of Government
Services.

Respectfully submitted,

J. C. Thatcher

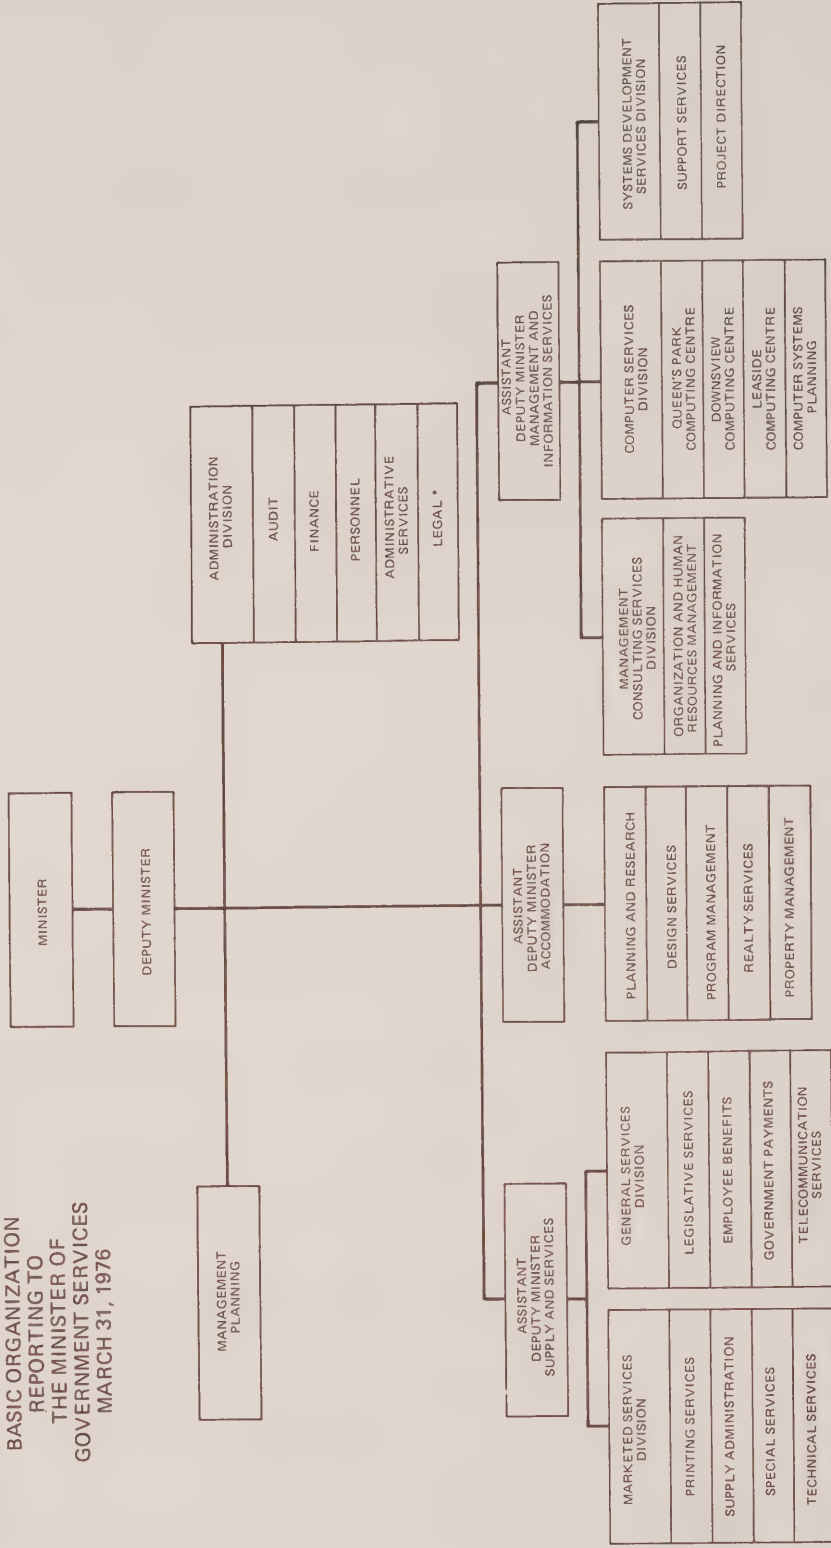

J. C. THATCHER,
Deputy Minister.

MINISTRY OF GOVERNMENT SERVICES

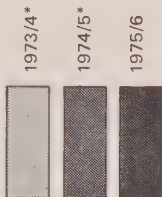

BASIC ORGANIZATION
REPORTING TO
THE MINISTER OF
GOVERNMENT SERVICES
MARCH 31, 1976

* Legal Services provided by the Ministry of the Attorney General

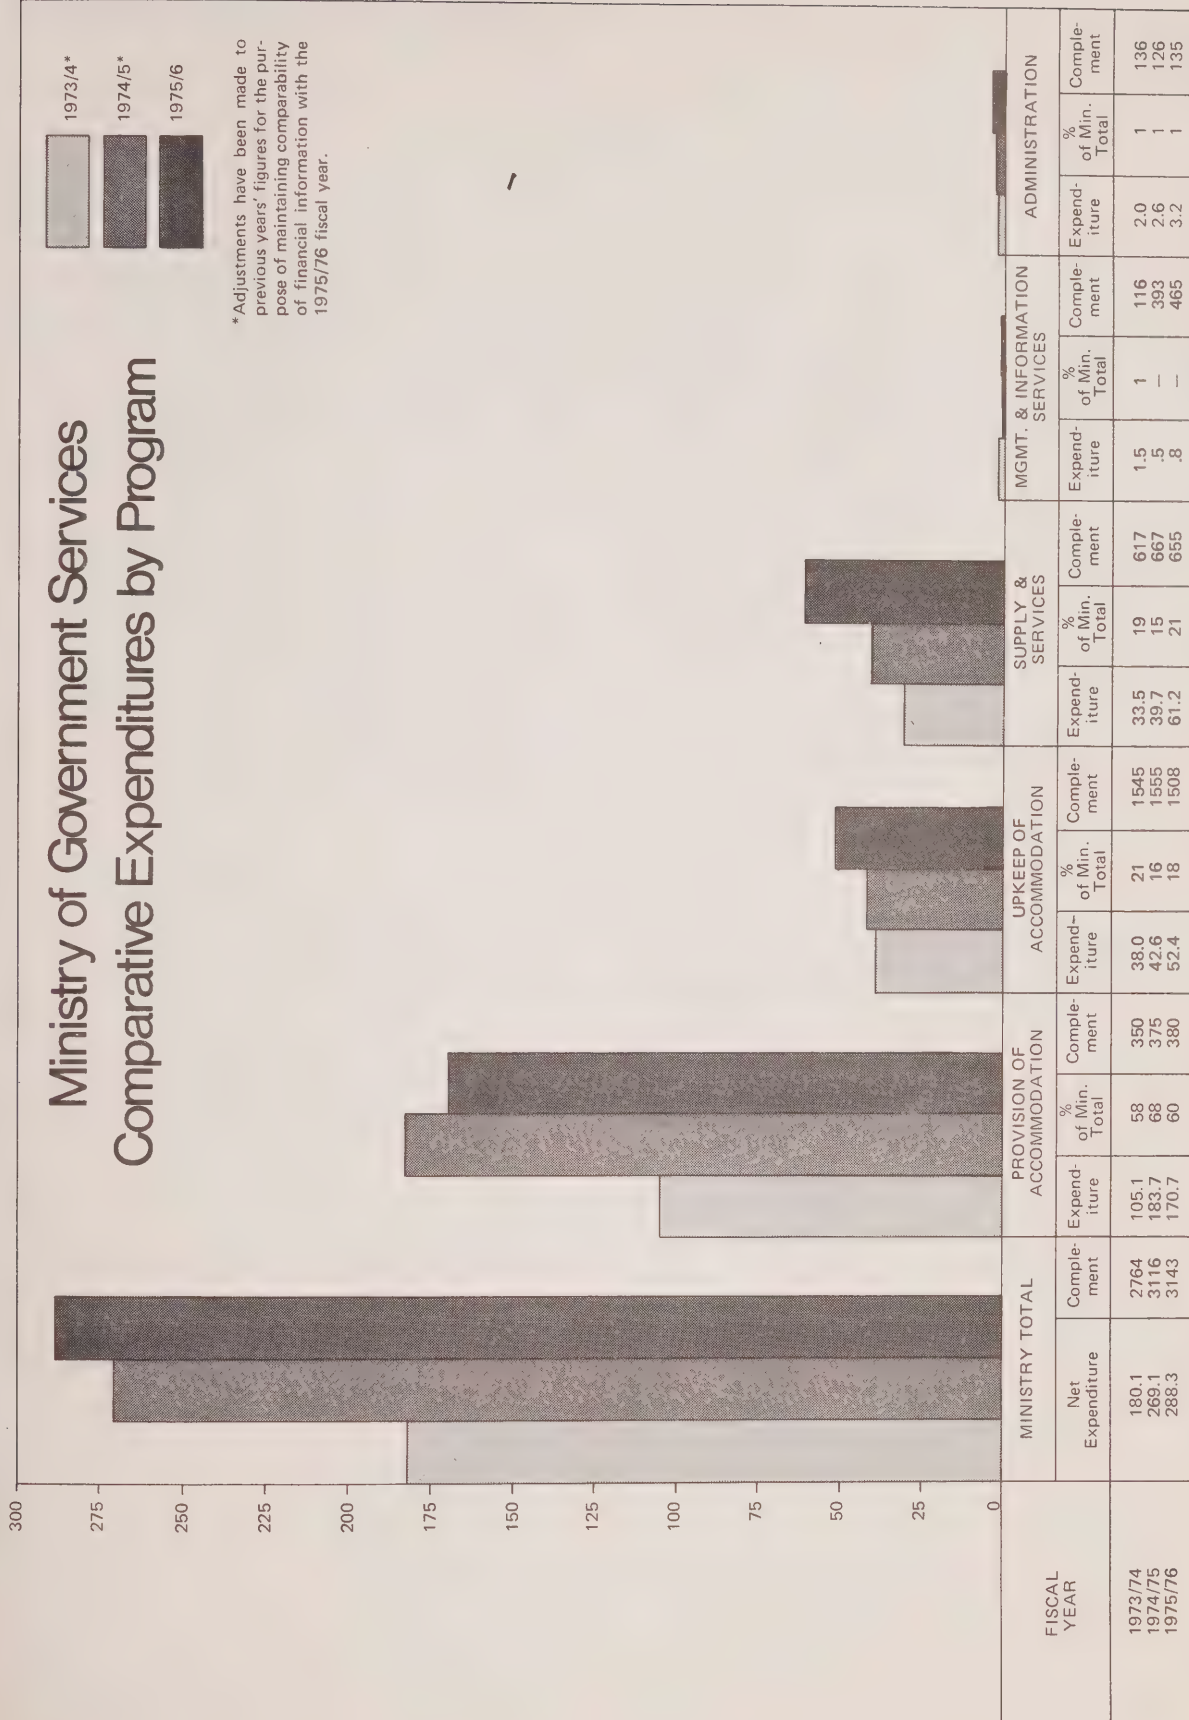

Ministry of Government Services

Comparative Expenditures by Program

*Adjustments have been made to previous years' figures for the purpose of maintaining comparability of financial information with the 1975/76 fiscal year.

\$
Millions

Administration Division

The Administration Division provides the Ministry with administrative support services and professional expertise in all aspects of the administrative process.

The Division consists of four Branches — Audit, Finance, Personnel and Administrative Services — and is responsible for providing administrative direction to the Legal Branch.

Audit Branch

The Audit Branch is responsible for providing management with objective evaluations of the financial and internal controls under which Ministry programs and activities operate.

The Branch continued its multi-year program of auditing all major activities in the Ministry, and established a data processing audit function to facilitate the audit of data processing systems of the Ministry.

Finance Branch

The Finance Branch processes and records the financial transactions of the Ministry, prepares financial reports on Ministry operations, and provides financial management and accounting systems support to program managers.

Commercial accounting practices continued to be employed for the financial reporting of those Branches of the Ministry which charge for their services. These practices were extended to other areas of the Ministry to provide management with a useful form of performance measurement.

In addition, the Branch continued to make use of computer-oriented systems as the most efficient and economic means of providing financial information to program managers.

Personnel Branch

This Branch provides personnel services to the Ministry which include recruitment, job evaluation, staff development and administration.

Job evaluation continued to ensure that employees were properly compensated for work performed, and a number of employees benefited from staff development activities designed to develop their full potential. In addition, the Branch finalized arrangements for the conversion of personnel records to the Integrated Payroll, Personnel and Employee Benefits System — a central computerized source of Ontario Government employee records data which is

being administered by the Ministry of Government Services.

Administrative direction was provided by the Branch in support of the Ministry's Affirmative Action Program, which has been established to help employees define and achieve their career objectives. During the year, an Advisory Committee and Task Force units were organized to ensure that the goals of the Affirmative Action Program are achieved in a coordinated and effective manner. Other activities included career development seminars, career counseling, the publication of Program newsletters and the establishment of a Career Information Centre.

On March 31, 1976, the Ministry had an approved complement of 3,062 and there were 463 employees in the unclassified service.

Administrative Services Branch

The Administrative Services Branch provides a variety of administrative services in support of Ministry programs.

The responsibilities of the Branch include the Ministry's records and forms management activities, visual identity enquiries, surplus assets reallocation, parking allocation, telephone listings and billings, publication subscriptions, identity cards and a central petty cash fund.

Legal Branch

Legal services are provided by the Ministry of the Attorney General; however, this Branch is a part of the Administration Division for administrative purposes.

This Branch ensures the legality of the Ministry's operations and services the needs of the various programs of the Ministry. It also performs such legal functions as are affiliated with the purchase, expropriation, leasing and sale of property; contracts, collections, claims, Orders-in-Council, drafting of legislation, providing legal opinions, and appearing before various courts and administrative tribunals.

Management Planning Branch

The Management Planning Branch is responsible for the development and support of the Ministry's corporate planning and control systems, and also provides executive assistance to the Deputy Minister.

Major activities of the Branch include the preparation of the Ministry's Multi-Year Plan, continuing analysis of Program activities to ensure consistency with government policy and Ministry goals and objectives, and Ministry liaison with Management Board Secretariat concerning policies and program proposals. The Branch also provides coordination for all systems projects in the Ministry, develops and arranges for the publication and distribution of Ministry policies and procedures, and provides public relations and information services to other ministries, the news media and the public.

During the year, a plan for Ministry programs was developed for implementation in the 1976/77 fiscal

year. A number of proposals were prepared and submitted for Management Board approval, and the Branch continued to administer the Performance Evaluation System, which is designed to measure the effectiveness of Ministry programs. Coordination was provided for various Ministry systems projects including the development and implementation of a computerized inventory of government accommodation. In addition, policies and procedures were developed and distributed for the guidance of managers in the Ministry.

Three issues of the Ministry's publication, "SPEC-TRUM", were produced keeping employees progressively informed on Ministry activities, and 71 News Releases were produced and distributed.

The Branch continued to provide executive assistance to the Deputy Minister on a variety of matters during the year.

Supply and Services

The Supply and Services Program covers a diverse range of administrative support functions required by all Ontario Government ministries and agencies. The Program facilitates the efficient and economical procurement of purchased goods and services, as well as the provision of several essential internal administrative services.

Supply and Services consists of twelve Branches and two smaller units, which are grouped into the Marketed Services Division and General Services Division.

Marketed Services Division

The primary responsibility of the Marketed Services Division is to supply certain commonly required goods and services to ministries and agencies at cost and service levels superior to those of competing sources of supply. The Division objective is to achieve efficiencies and economies of scale in competition with commercial and alternative Ontario Government supply sources.

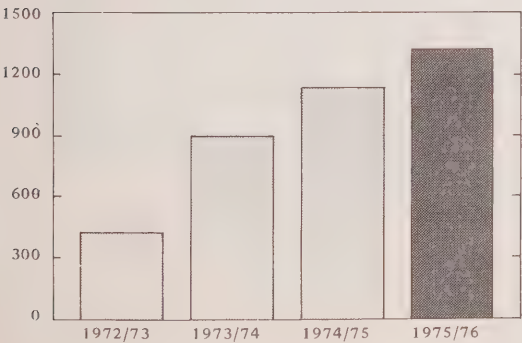

Printing Services Branch

The Printing Services Branch is responsible for four activities — print procurement, the distribution of publications, duplicating and stationery supply services.

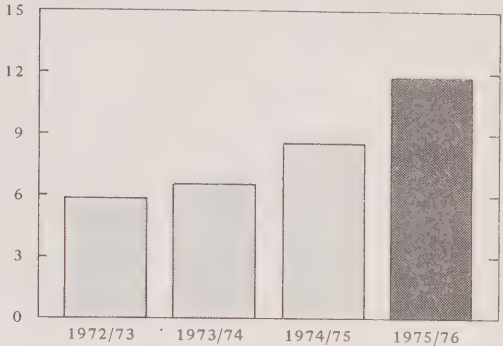

The Print Procurement Section provides a graphic arts advisory service and purchases printing services from the private sector, as required by ministries and agencies. Additional responsibilities include the contracting for all legislative printing, including the Ontario Gazette, and the publication of the Ontario Government Telephone Directory.

PRINT PROCUREMENT SECTION

Number of printing tenders placed (orders valued over \$1,000 only)

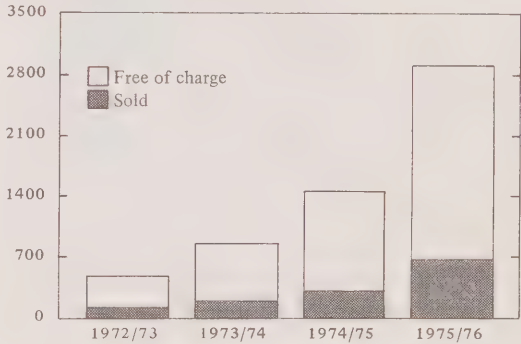

Value of all printing orders processed (\$Millions)

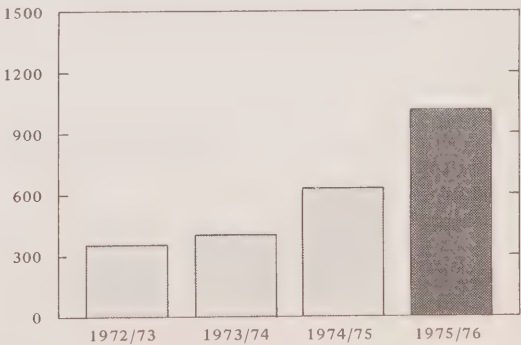

The Publications Service is responsible for distributing Ontario Government publications to the public, and to ministries and agencies, through outlets which include the Ontario Government Bookstore, the Publications Centre and a province-wide library depository system.

PUBLICATIONS SERVICE

Number of publication copies distributed (000)

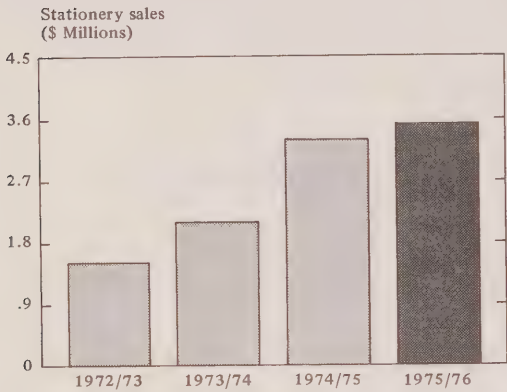

Value of publication copies sold (\$000)

The Government Duplicating Service is the only large duplicating facility serving ministries and agencies in the Queen's Park area. During the fiscal year, this Section received a total of 11,000 requisitions which resulted in the production of 110 million copies and a total sales volume of \$1,750,000.

The Government Stationery Service is available to ministries and agencies as a main supply centre for over 1,600 stationery and office supply items which are used by government offices in Queen's Park and throughout Ontario. Activities of this Section during the year included the production of a new giftware catalogue and a continued expansion of customer services.

GOVERNMENT STATIONERY SERVICE

Supply Administration Branch

The Supply Administration Branch comprises five sections which provide a variety of supply services to ministries and agencies.

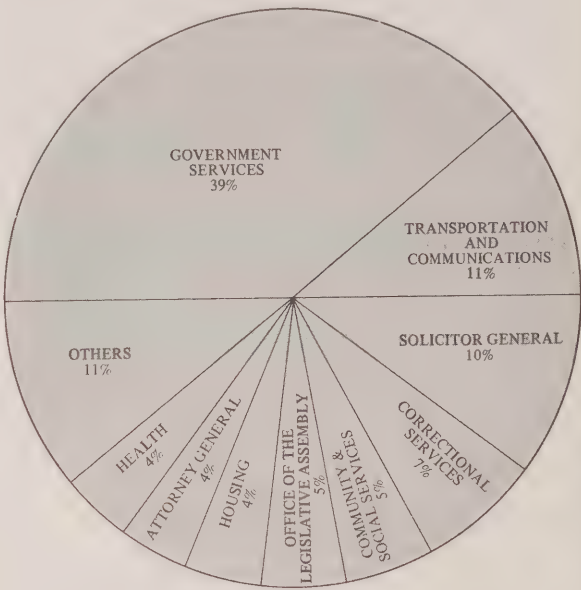

Three commodity sections — Furniture and Furnishings, Office Products and Special Products — are responsible for the acquisition of goods and services through direct purchasing and supply consolidation. The Branch also administers a number of supply support functions which are the responsibilities of the Supplier Development Section and the Assets Disposal Service.

During the year, the commodity sections handled 7,878 purchase orders representing a total value of \$9,588,000.

PURCHASING

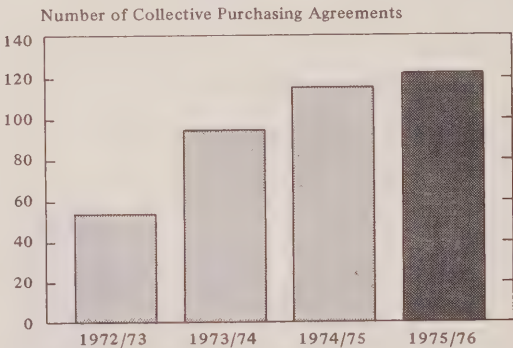

Percentage value of purchases by ministries and agencies

Total value of purchases — \$9,588,000.

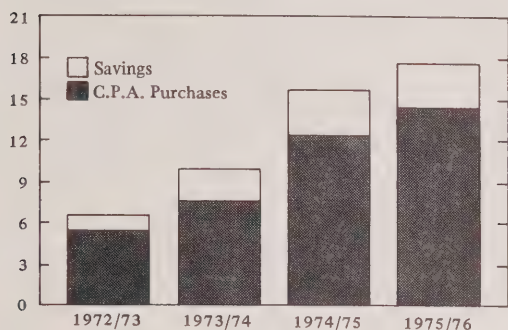

Supply consolidation involves the establishment of Collective Purchasing Agreements in cooperation with ministries and agencies to ensure the economic supply of commonly used goods and services.

SUPPLY CONSOLIDATION

Value of Collective Purchasing Agreements
(\$ Millions)

The Supplier Development Section is responsible for the operation of the Public Tenders Office which provides a central tendering service to ministries and agencies to ensure fair competition in the awarding of government supply contracts. This section also provides administrative support to the Branch by developing and maintaining a central supplier list, identifying and evaluating new suppliers, and cataloguing products which are supplied to the government.

During the year, the Public Tenders Office processed a total of 2,097 tenders in various categories which resulted in \$36,300,000 in contract awards.

The Assets Disposal Service is responsible for the receipt, storage and disposal of furniture and equipment which has been declared surplus by ministries and agencies. Surplus items are either reallocated within the government as required, or disposed of by public tender or auction.

The total value of surplus assets reallocated during the year was \$642,000. The sale of surplus assets to the public amounted to \$1,038,000.

Technical Services Branch

The Technical Services Branch provided special support services to assist in the achievement of economy and efficiency in the supply of purchased goods and services to ministries and agencies.

During the year, the Branch participated in a number of projects involving inventory control, warehousing, materials management, distribution and productivity improvement.

The Technical Services Branch was discontinued effective April 1, 1976. Some of the functions and staff of the Branch were reassigned to other areas of the Ministry and the Ontario Government as part of a continuing effort to ensure that Ministry organizations are designed to provide the most efficient and effective service with a minimum of staff resources.

Special Services Branch

This Branch provides specialized support services to ministries and agencies, namely the government mail service, a collections service and a repair and trucking service.

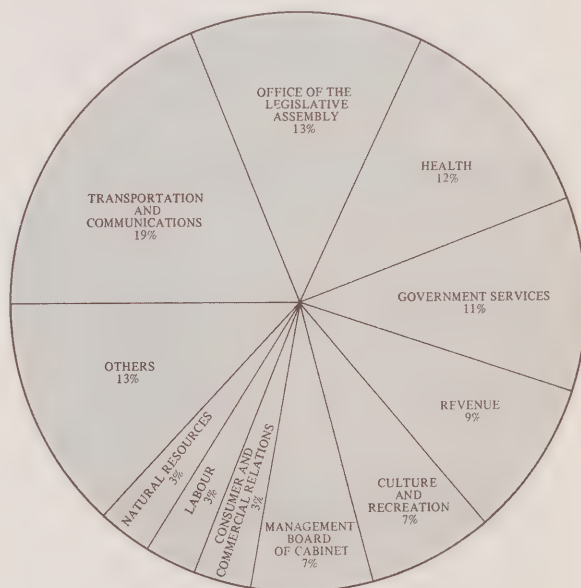

The Government Mail Service handles most of the government mail for Queen's Park and Metropolitan Toronto government offices. It administers an economical mass mailing service which consists of operations such as high speed folding, addressing, inserting, sealing and metering.

Activities of the Government Mail Service during the year included coordinating the provision of emergency mail services during disruptions at the Canada Post Office.

GOVERNMENT MAIL SERVICE

Percentage of Mass Mail processed for ministries and agencies

Total Mass Mail processed — 49,539,000 pieces

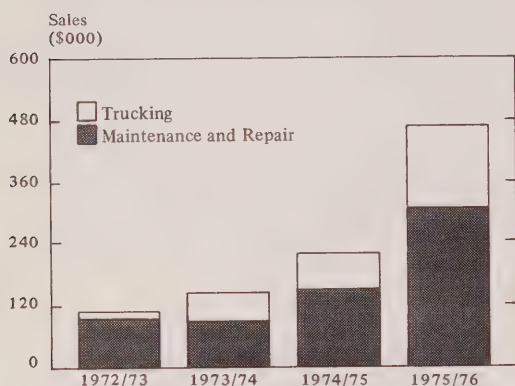

The Central Collection Service offers assistance to client ministries in the collection of overdue accounts.

As of March 31, 1976 —

Number of accounts for collection	7,083
Dollar value of outstanding accounts	\$4,225,054
Dollar value of collections made	\$1,136,300

The Repair and Trucking Service carries out maintenance and repairs for vehicles and equipment of the Ministry of Government Services and offers a similar service to other ministries. The section provides a daily, scheduled delivery service for mail, stationery and printing provided by the Ministry to 134 government offices in Toronto. In addition, it offers a low cost trucking service to all ministries and agencies.

REPAIR AND TRUCKING SERVICE

General Services Division

The General Services Division provides services of a corporate support nature to the daily operations of ministries, agencies and Members of the Legislative Assembly. Other services of the Division help facilitate communication between citizens and the Government of Ontario.

The Division consists of eight Branches as well as two specialized service units — the Employee Advisory Service and Insurance and Risk Management.

Legislative Services Branch

The Legislative Services Branch provides efficient and expeditious operational maintenance and support services in the Legislative Building to the Lieutenant-Governor, Office of the Speaker, Office of the Premier, Members of the Legislature, Legislative Library, Legislative Press Gallery, Media Studio and visitors to the Legislative Building.

Responsibilities of the Branch include minor repairs and improvements, housekeeping, physical moving and relocations, vehicle parking, messenger and steward services, and assisting in arrangements for special functions.

In addition, the Branch administers the Media Studio which provides Members of the Legislature with specialized equipment and facilities for news conferences, as well as the taping and filming of reports, interviews and programs which are broadcast and telecast in members' constituencies. The Media Studio is also utilized for the production of radio news releases concerning government policy and the dissemination of these releases to radio stations throughout Ontario.

During the fiscal year, a total of 89 news conferences were held in the Media Studio, and 361 radio news releases were produced and disseminated.

Employee Benefits Branch

The Employee Benefits Branch administers a comprehensive benefits program for employees in the Ontario Public Service and certain designated agencies, boards and commissions in accordance with the Public Service Superannuation Act and various insurance plans. The Branch provides a service to the Office of the Assembly in assisting with a benefits program for Members of the Legislature, in accordance with the Legislature Assembly Retirement Allowances Act and other plans made available to Members.

The Branch is responsible for clearing contributions from all ministries for the Canada Pension Plan, Unemployment Insurance Commission and Ontario Health Insurance Plan. Additional responsibilities include liaison with life and health insurance underwriters, providing advice and guidance in the planning and formulation of policy for the combined benefits program, and secretariat functions for the Public Service Superannuation Board.

During the year, the Branch administered the implementation of the Superannuation Adjustment Benefits Act, a contributory supplementary pension plan which provides eligible pensioners with limited protection, to a maximum of 8 per cent per annum, against pension erosion caused by inflation. The Branch also administered an amendment to the Public Service Superannuation Act through which eligibility for additional benefits was extended to employees with wartime service in allied military forces. In addition, the Branch contributed to the development of government employee benefits policy and assisted in the implementation of such policy in conjunction with various ministries and agencies of the government.

Government Payments Branch

The Government Payments Branch is responsible for providing the operational resources required to administer and record government payments from the Consolidated Revenue Fund. The Branch also transfers funds between banks and reconciles bank account balances.

During the year, the Branch processed approximately 10,000,000 cheques for the Ontario Government Payroll, Accounts Payable, Superannuation, Guaranteed Annual Income Supplement Program (GAINS), Farm Tax Reduction Assistance Program, Family Benefits, Rehabilitation Grants, and Student Awards.

In addition, members of Branch staff were transferred to the new Employee Data Services Branch to implement payroll functions associated with the Integrated Payroll, Personnel and Employee Benefits System. The Branch also initiated the study and development of a computerized reconciliation system with the objective of attaining improved efficiency in the processing of government cheques.

Telecommunication Services Branch

Telecommunication Services Branch is responsible for providing ministries and agencies with a complete range of telecommunication services which include telephone, data communication, teletype, radio, intercom, image transmission, satellite and related communication modes.

Common services provided by the Branch include consolidated telephone systems for Queen's Park and government offices in Metropolitan Toronto, the Court House and Land Registry Office, London, Ontario, and the Ontario Government Building, Thunder Bay. The Branch also administers the Inter City Network which provides toll free calling between Queen's Park and major government facilities throughout Ontario. On a typical day, the switchboard operators for these common telephone services handled approximately 18,000 calls. Savings in long distance charges and administration costs realized through the use of both services amounted to \$4.5 million during the year.

Additional Branch activity included the coordination of planning in preparation for the implementation of the Ontario Government's Communications Technology Satellite Program during the 1976/77 fiscal year.

Records Services Branch

This Branch provided ministries and agencies with advice and assistance concerning records and forms management, forms design, records scheduling, micro-recording, and the development of file classification plans and technical systems. The advisory role of the Branch was reinforced through liaison with records staff in ministries, and through the provision of training courses for government employees involved in records and forms management activities.

The Branch provided storage facilities for inactive hard copy records, vital records, microfilm security copy tapes and automatic data processing security copy tapes at the Records Centre, located in Mississauga. The Branch also maintained liaison with the Archives of Ontario to ensure the safeguarding of records with long term research significance or which relate to the history of Ontario.

During the year, total savings from basic records management activity amounted to \$1,215,873. These savings reflect conserved space, recovered equipment, improved retrieval time and those activities for which economic factors have been established. The forms activity of the Branch provided for an additional saving of \$118,329 in procurement costs, as well as substantial reductions in processing time.

The following refers to activities of the Records Centre for the fiscal year:

Records Centre holdings	170,084 cu. ft.
Records destroyed	8,397 cu. ft.
Records transferred to Archives of Ontario	45 cu. ft.

In addition, qualified personnel from the Branch spent 495 instruction hours training 317 participants from the Ontario Public Service.

Effective April 1, 1976, activities of the Records Services Branch were reassigned to other areas within the Ministry and the Ontario Government as part of a continuing effort to ensure that Ministry organizations are designed to provide the most efficient and effective service with a minimum of staff resources.

Employee Data Services Branch

The Employee Data Services Branch was established in June 1975 to implement and maintain the Integrated Payroll, Personnel and Employee Benefits System (IPPEBS) for the Ontario Government.

IPPEBS is a central, computerized source of Ontario Government employee data which is supplied

by the personnel and payroll units of each ministry and agency. The System was developed to function as the operational base for the production of government payroll cheques, and provide for the efficient retrieval of payroll, personnel and employee benefits information required for administrative purposes.

During the year, the Employee Data Services Branch completed the testing of IPPEBS, following which it administered the production of payroll cheques of the Ministry of the Environment — the first ministry to use the System on a production basis. In addition, the Branch worked in conjunction with several other ministries in preparation for their conversions to IPPEBS. The conversion of all ministries to the new System was scheduled for completion during the 1976/77 fiscal year.

Protocol Services Branch

The Protocol Services Branch provides consultative and operational services to ministries and agencies in response to enquiries about protocol procedure or official etiquette, and to assist in the organization and management of official visits, hospitality functions, special events and formal government ceremonies and conferences.

In addition, the Branch maintains official liaison with foreign consular representatives in Ontario, and works in support of the Technical Assistance Training Program of the Canadian International Development Agency by coordinating the study programs of foreign students who are receiving career training within the Government of Ontario.

The Branch prepares, records and microfilms official documents issued under the Great Seal of Ontario, the Privy Seal of the Lieutenant-Governor and the Ministry of Government Services Seal. It also prepares congratulatory scrolls for presentation to Ontario citizens in recognition of ninetieth or succeeding birthdays, fiftieth or succeeding wedding anniversaries, significant individual accomplishments and special jubilees.

During the fiscal year, the Branch participated in arrangements for 47 official visits to Ontario, 158 hospitality functions, 29 special events, two government ceremonies, one conference, and the training of eleven foreign students.

A total of 25,736 official documents were processed, while 7,188 congratulatory scrolls were prepared for presentation to Ontario citizens.

Employee Health Services Branch

The Employee Health Services Branch was transferred to the Ministry of Government Services from the Ministry of Health, effective April 1, 1975.

The Branch administers an occupational health program for employees of the Ontario Government through fourteen Health Centres which are located at Queen's Park and throughout Metropolitan Toronto. These Centres provide emergency and non-emergency medical care services, physical examinations, immunizations, consultation services for personal health problems, health education, and referrals to medical services within the community. The Branch is also responsible for screening new employees for tuberculosis, providing medical treatments for employees with problems related to alcohol and drug addiction, advising management on matters such as the performance of employees with health problems, and the maintenance of proper hygienic conditions in government facilities.

During the year, health services were provided through the Branch to a total of 67,169 government employees.

Employee Advisory Service

The Employee Advisory Service, formerly the Employee Counselling Section of the Employee Health Services Branch, was renamed and established in January 1976 as a separate organizational unit.

The Employee Advisory Service provides counselling and referral services in cases where alcohol, drug addiction or other social problems are affecting the work performance of an individual employee. These services are also offered to assist the employee in matters related to pension and insurance benefits planning, retirement planning, and the attainment of day care services.

Insurance and Risk Management

The Insurance and Risk Management Unit administers insurance and risk management programs, purchases insurance for the government, and provides ministries and agencies with expertise to develop, implement and maintain controls over risk exposure and loss prevention.

During the year, the Unit continued to utilize tendering procedures to obtain government-wide insurance coverage so that premium savings might be real-

ized in the purchase of road liability, comprehensive general liability and automobile fleet insurance.

New loss prevention studies were initiated to reduce losses associated with government self-insurance and liability programs, and to achieve further savings in insurance premiums. Studies were also undertaken to ascertain whether some current insurance policies could be cancelled, in accordance with Ontario Government policy to self-insure against all risks to physical assets.

In addition, ministry and agency liaison representatives were appointed in conjunction with the Insurance and Risk Management Unit to ensure the efficient handling of claims and administration of loss prevention programs.

Management and Information Services

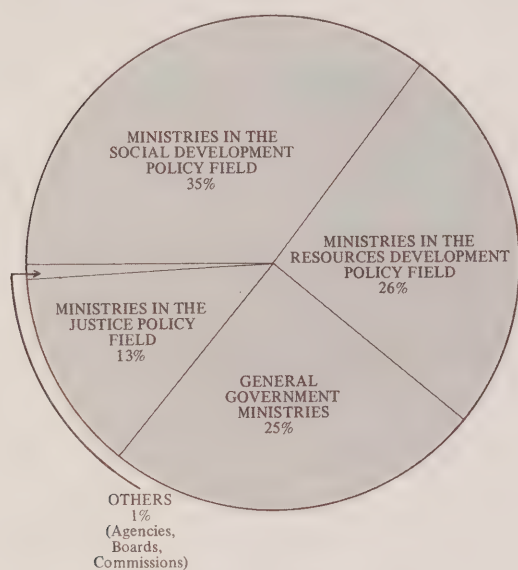

The Management and Information Services Program provides management consulting, systems development and computer services to ministries and agencies of the Ontario Government. This Program is somewhat unique in government since it provides services to ministries and agencies on a charge-back basis, in competition with the private sector.

The Program is organized into three Divisions — Management Consulting Services, Computer Services, and Systems Development Services.

MANAGEMENT AND INFORMATION SERVICES

Percentage of revenue by Policy Field

Total Program revenue — \$21,035,000.

Management Consulting Services Division

The Management Consulting Services Division provides a wide range of professional consulting services to assist ministries and agencies in solving complex management problems. The services offered are designed to improve the overall public administrative practice within the Ontario Government.

The capability of this service has been developed to include multi-disciplinary skills and extensive practical experience in the field of management. The span of disciplines includes business administration, economics, industrial engineering, behavioural sciences, information systems, computer science, operations research and actuarial science.

Services are provided through two organizational areas of operation — Organization and Human Resources Management and Planning and Information Services. During the fiscal year resources were applied to a total of 84 projects at the request of ministries and agencies.

System Development Services Division

The Systems Development Services Division provides ministries and agencies with a variety of services related to the application of data processing and manual information systems to government operations. These services are designed to facilitate management decision-making in areas of policy evaluation and development.

The Division offers services in the areas of computer programming, feasibility studies, cost/benefit analyses, systems analysis and design, conversion, user education, project management and systems maintenance services. The Division also assists clients in acquiring more specialized technical capabilities from private sector consulting and programming firms.

During the year, project direction was provided by the Division for a total of 343 projects for various ministries and agencies.

Computer Services Division

The Computer Services Division provides computer services in support of the operational programs and service-delivery functions of ministries and agencies of the Ontario Government.

The Division consists of three computing centres, located in Queen's Park, Downsview and Leaside, as well as a Computer Systems Planning Branch, which is a source of technology planning and computer systems support services.

A major technology tender was completed in the latter part of the previous fiscal year which resulted in significant equipment changes at each computing centre during 1975/76. These equipment changes were designed to provide the increased computer capacity necessary to service the government's overall computer requirements in an efficient and effective manner.

Accommodation

Accommodation Program

The Accommodation Program provides accommodation facilities for ministries and agencies of the Ontario Government. This objective is achieved through the provision of a comprehensive range of related services by five Branches — Planning and Research, Design Services, Program Management, Realty Services, and Property Management.

Planning and Research Branch

The Planning and Research Branch is responsible for long term government accommodation planning, and for allocating government space to ministries and agencies.

During the fiscal year, the Branch implemented accommodation changes for most ministries and agencies of the government which included the provision of new accommodation for two ministries in the George Drew Building, Toronto. Planning was finalized for three facilities which are now under construction — a Court House and Registry Office in Kitchener, and consolidated government office buildings in Windsor and Dryden. The Branch also developed plans for consolidated government office buildings in Hamilton, Sudbury, Ottawa, Timmins and Kenora, and undertook long term studies for consolidated

facilities in Whitby and Kirkland Lake. In addition, the Branch participated in preliminary planning for the establishment of rent review offices throughout Ontario.

Major Branch research activities included a study of the Ontario Government vehicle parking policy, completion of a five year accommodation plan, and participation in the development of a computerized government accommodation information system.

Additional activities included reviewing requests for office space, surveying ministries for the possible utilization of surplus land and reviewing government space standards.

Design Services Branch

The Design Services Branch is responsible for the control of all phases of architectural and engineering design, construction supervision and the provision of furniture and equipment for all accommodation projects of ministries. Design consulting services are provided for other ministries as required, as well as for the Ministry of Government Services.

There were 84 major projects in various stages of construction during the fiscal year and 30 minor projects for which design was completed. These projects represented a total expenditure of \$79,036,000. Approximately 164 new projects were initiated and these progressed through various stages of study and design.

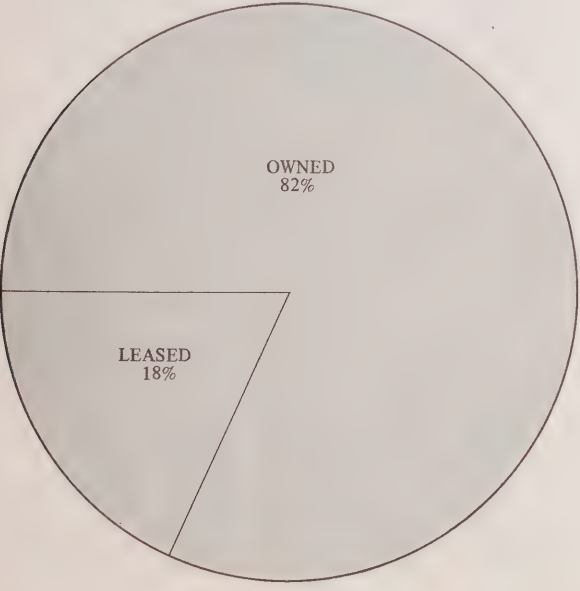

Projects undertaken for the Ministry of Transportation and Communications included the construction of a District Office Building in New Liskeard, District Services Building in Huntsville, and Materials and Equipment Storage Yards in North Bay. Completed projects included an Office Building, Materials and Testing Laboratory and site development at the Ministry complex in London, and a Materials and Testing Laboratory in North Bay.

Construction of a Provincial Court House and Land Registry Office was started for the Ministry of the Attorney General. Projects completed for the Ministry included the Juvenile Observation Centre in London and a new Court Room at 145 Queen Street West, Toronto.

Ministry of Health projects which got under way included kitchen renovations at the Whitby Psychiatric Hospital and demolition at the Queen Street Mental Health Centre in Toronto, and at the Hamilton Psychiatric Hospital. Renovations of the Auchmar Building continued at the Hamilton Psychiatric Hospital, as did construction of the Children's Centre at the Kingston Psychiatric Hospital.

GOVERNMENT BUILDINGS LEASED AND OWNED

Total area of buildings — 39,569,000 sq. ft.

Projects started for the Ministry of Natural Resources included a Regional Service Centre in Thunder Bay and a Fish Rearing Station in Dorion. Completed for the Ministry was the Seed Extraction Plant at Angus.

Construction of a Swine Breeding Barn was started in Ridgetown and a Turkey and Poultry Research Unit was completed at Arkell, both for the Ministry of Agriculture and Food.

Completed projects of the Ministry of the Solicitor General included the George Drew Building (Centre of Forensic Sciences), and head office renovations, both in Toronto, and the construction of an O.P.P. Detachment Building in Cochrane. Construction continued at the Ontario Police College in Aylmer.

Projects for the Ministry of Community and Social Services included the Ortona facilities for the retarded in Oakville and renovations to provide a residence and activities building at Northam Industrial Park, Cobourg.

Additional projects started during the year included preliminary site services at the Ontario Sports Training Centre at Bronte for the Ministry of Culture and Recreation, Ontario Government Buildings in Dryden and Windsor, and a parking garage for the Hamilton Trade and Convention Centre and Ontario Government Building, Hamilton.

Other completed projects included construction of the Maplehurst Correctional Centre and Adult Training Centre in Milton for the Ministry of Correctional Services, and renovations to provide the Ministry with new administrative offices in Scarborough. Alterations and additions were also completed in the Leaside, Downsview and Queen's Park Computing Centres for the Ministry of Government Services.

Program Management Branch

The Program Management Branch is responsible for the planning, budgeting, scheduling and overall client liaison necessary for the effective provision of accommodation facilities for the Ontario Government.

The Branch serves as the prime liaison with client ministries and coordinates accommodation projects related to capital accommodation, land acquisition for capital projects, leasing, lease-purchase and accommodation alterations.

During the year the Branch coordinated some 964 different accommodation projects for the various ministries of the Ontario Government and managed

the related funds which totalled approximately \$92 million for the year.

ACCOMMODATION PROJECTS COORDINATED

— Capital Construction Projects	— 469
— Accommodation Alteration Projects	— 185
— New Leases	— 264
— Land Acquisition for Capital Projects	— 46
	<u>964</u>

Realty Services Branch

The Realty Services Branch provides realty services for most government ministries, including the Ministry of Government Services accommodation program. These services include the appraisal, negotiation and acquisition of land and buildings, the leasing of office space, disposal of surplus properties, and the interim management of government-owned properties.

In addition, the Branch maintains inventories of government properties, and administers the Government of Ontario Employee Home Owner Assistance Plan, which is designed to assist employees who, through organizational change, are moved from one locality to another. The Branch also provides an advisory service to Boards, Commissions and Crown Agencies on real estate matters.

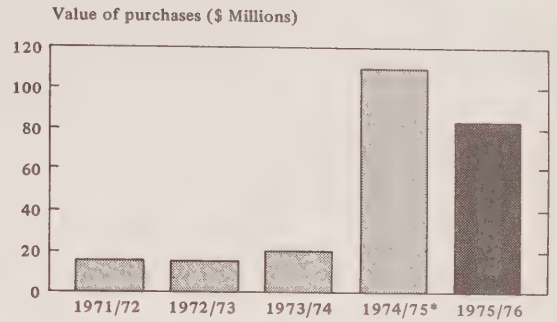

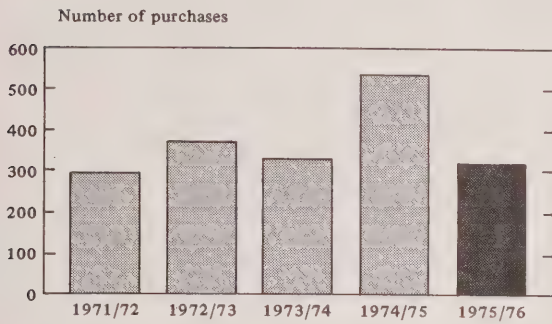

During the year, the Branch undertook responsibility for the acquisition of properties for the Ministries of the Environment and Housing, and continued its land acquisition activity in the Parkway Belt West.

Interim management continued to ensure the effective short term utilization of government-owned properties until required for development. Such properties included land and buildings acquired in the Parkway Belt West and for the Government Townsites Program, as well as properties of the Ontario Housing Corporation and a number of government ministries.

Approximately 1,450 properties were under interim management during the year. A total of 1,252 of these properties were leased by the Branch, providing \$2,100,000 in rental income.

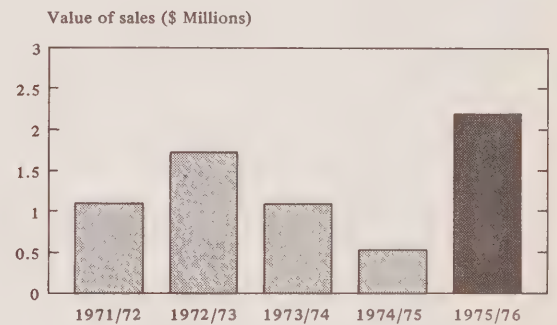

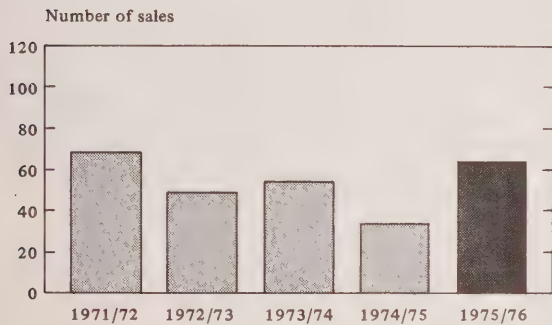

COMPLETED REALTY TRANSACTIONS

PURCHASES

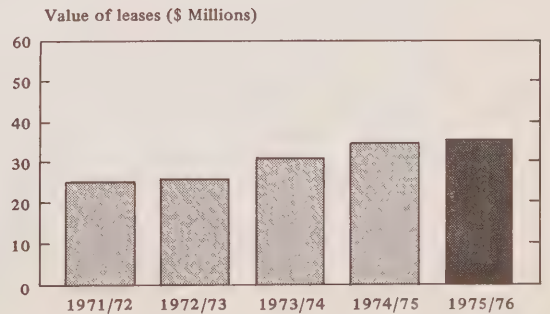

*Increase in purchases during 1974/75 is primarily due to acquisitions for the Parkway Belt West and Government Townsites.

Property Management Branch

The Property Management Branch provides operational maintenance and repair services to government-owned buildings through twelve Regional and four Field Area offices, which are located throughout Ontario.

The Branch is responsible for the servicing and repair of building structures; heating, ventilating, air-conditioning and electrical systems; the provision of cleaning, security and grounds maintenance; and common administrative services in consolidated government office buildings.

In addition, the Branch is responsible for the tendering and construction of minor capital projects, as well as alterations and improvements for both leased and government-owned buildings.

Other services include the administration of the Ministry's safety program to ensure safe conditions in government buildings and on new building construction sites; coordination of government employees' parking; the physical moving of ministries to new locations; coordination of displays by various ministries at the London, Ottawa and Thunder Bay exhibitions; and the tendering and administration of catering contracts for cafeterias and vending machine operations in Provincial Court Houses and office buildings occupied by government ministries.

The total expenditures for all services in the 1975/76 fiscal year was \$52,467,000.

Ministry of
Government
Services

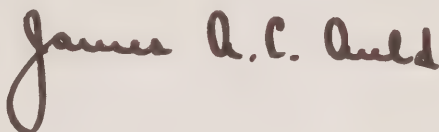

*To Her Honour, The Lieutenant-Governor of
The Province of Ontario*

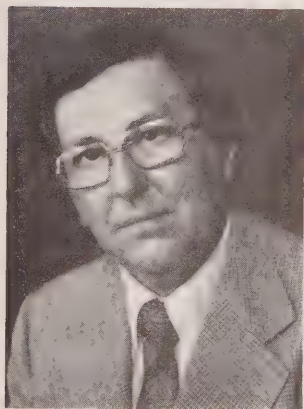

MAY IT PLEASE YOUR HONOUR:

I have the privilege of presenting for the information
of Your Honour and the Legislative Assembly, the
Annual Report of the Ministry of Government
Services for the fiscal year beginning April 1, 1976
and ending March 31, 1977.

Respectfully submitted,

A handwritten signature in dark ink, reading "James A. C. Auld".

JAMES A. C. AULD,
Minister (Acting)

*The Honourable James A. C. Auld,
Minister of Government Services (Acting)*

SIR:

I have the honour to submit for your approval the
1976/77 Annual Report of the Ministry of
Government Services.

Respectfully submitted,

A handwritten signature in dark ink, reading "J. C. Thatcher".

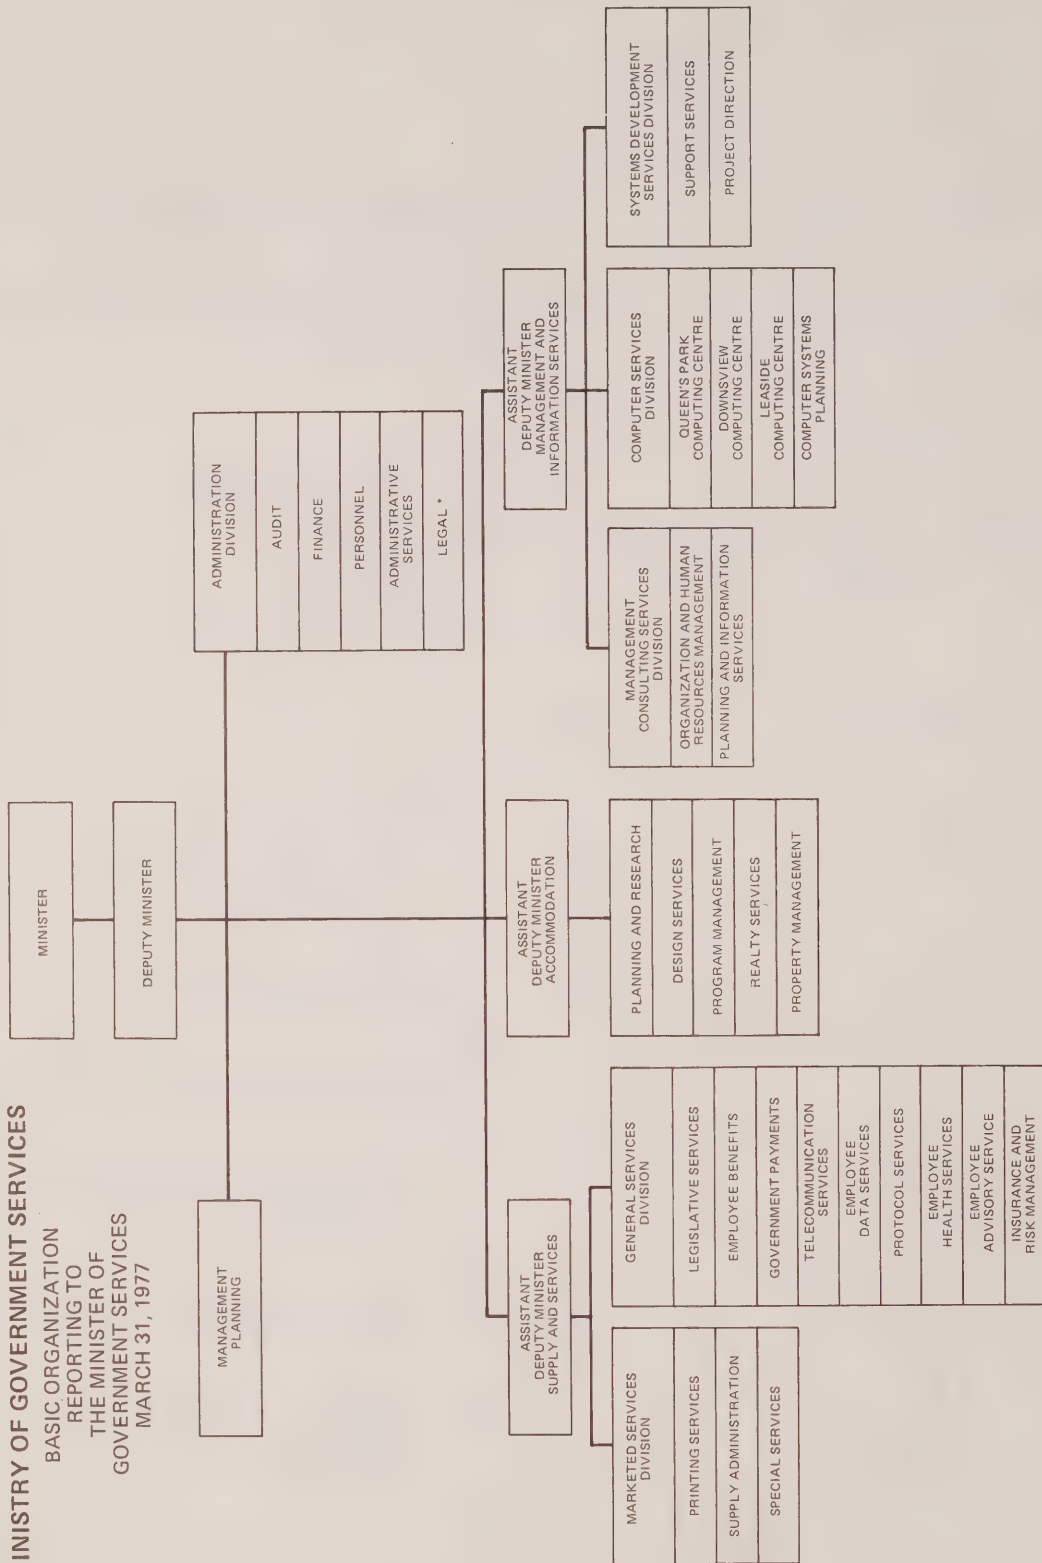

J. C. THATCHER,
Deputy Minister.

Administration Division

The Administration Division provides administrative support services and professional expertise in all aspects of the Ministry's administrative process.

The Division consists of four Branches — Audit, Finance, Personnel and Administrative Services — and is responsible for providing administrative direction to the Legal Branch.

Audit Branch

The Audit Branch is responsible for providing management with objective assessments of the financial and internal controls which govern Ministry programs and activities.

During the fiscal year, the Branch concluded a number of financial audits as part of a multi-year program which covers all major activities of the Ministry. The Branch also provided special audit services as requested by senior management within the Ministry.

Finance Branch

The Finance Branch processes and records financial transactions of the Ministry, prepares financial reports on Ministry operations, and provides financial management and accounting systems support to program managers. The Branch also maintains financial control over Ministry assets and advises on transactions of a financial nature, as required.

During the year the Branch developed further computerization of its accounts payable, accounts receivable, asset control and appropriation control systems to ensure the efficient and economical provision of financial information to program managers.

In addition, the Branch continued to employ commercial accounting practices for the financial reporting of those Branches of the Ministry which charge for their services.

Personnel Branch

This Branch provides personnel services to the Ministry which include recruitment, job evaluation, staff development and administration.

The Branch continued to provide support to Ministry operations by administering the recruitment of suitably qualified individuals, both for regular and contract positions. Job evaluation ensured that employees were properly compensated for work performed, and a number of employees benefited from activities designed to help develop their full potential, such as job related training courses.

Through the Ministry's Affirmative Action Program, assistance was provided to employees in the establishment and achievement of their career objectives. During the year, study was initiated on an employee job rotation program which is planned for implementation within the Ministry. Additional activities included the presentation of career development seminars, career counselling, the regular publication of the Program's newsletter, "Equilibrium", and the administration of a Career Information Centre.

On March 31, 1977, the Ministry had an approved complement of 3,030 and there were 405 employees in the unclassified service.

Administrative Services Branch

The Administrative Services Branch provides a variety of general administrative services in support of Ministry programs.

Responsibilities of the Branch include records and forms management activities, visual identity enquiries, surplus assets reallocation, parking allocation, telephone listings and billings, publication subscriptions, identity cards and a central petty cash fund.

Legal Branch

Legal services are provided by the Ministry of the Attorney General; however, this Branch is a part of the Administration Division for administrative purposes.

The Legal Branch ensures the legality of the Ministry's operations and serves the needs of the various programs of the Ministry. It also performs such legal functions as are affiliated with the purchase, expropriation, leasing and sale of property; contracts, collections, claims, Orders-in-Council, drafting of legislation, providing legal opinions, and appearing before various courts and administrative tribunals.

Management Planning Branch

The Management Planning Branch is responsible for the development and support of the Ministry's corporate planning and control systems, and also provides executive assistance to the Deputy Minister.

Major activities of the Branch include the preparation of the Ministry's Multi-Year Plan, continuing analysis of the Ministry's program activities to ensure consistency with government policy and Ministry goals and objectives, and Ministry liaison with Management Board Secretariat concerning policies and program proposals. The Branch also provides coordination for all systems projects in the Ministry, develops and arranges for the publication and distribution of Ministry policies and procedures, and provides public relations and information services in support of Ministry programs to other ministries, the news media and the public.

During the year, a plan for Ministry programs was developed for implementation in the 1977/78 fiscal year. A number of proposals were prepared and submitted for Management Board approval, and the

Branch continued to administer the Performance Evaluation System, which is designed to measure the effectiveness of Ministry programs. Coordination was provided for various Ministry systems projects including the development and implementation of a computerized inventory of government accommodation. In addition, policies and procedures were developed and distributed for the guidance of managers in the Ministry.

Four issues of the Ministry's publication, "SPECTRUM", were produced keeping employees progressively informed on Ministry activities, and 72 News Releases were produced and distributed. Public relations services were also provided for a total of 33 public events involving the Ministry, which included official opening and sod-turning ceremonies throughout the province and cultural presentations at Queen's Park.

The Branch continued to provide executive assistance to the Deputy Minister in a variety of matters during the year.

Supply and Services

The Supply and Services Program covers a diverse range of administrative support functions required by all Ontario Government ministries and agencies. The Program facilitates the efficient and economical procurement of purchased goods and services as well as the provision of several essential internal administrative services.

Supply and Services consists of ten Branches and two smaller units, which are organized into the Marketed Services Division and General Services Division.

Marketed Services Division

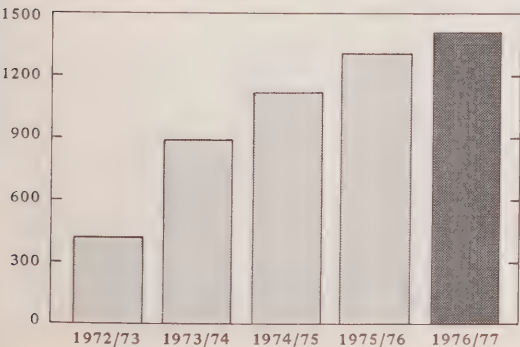

The main responsibility of the Marketed Services Division is to supply certain commonly required goods and services to ministries and agencies at cost and service levels superior to those of competing sources of supply. The Division objective is to achieve efficiencies and economies of scale in competition with commercial and alternative Ontario Government supply sources.

Printing Services Branch

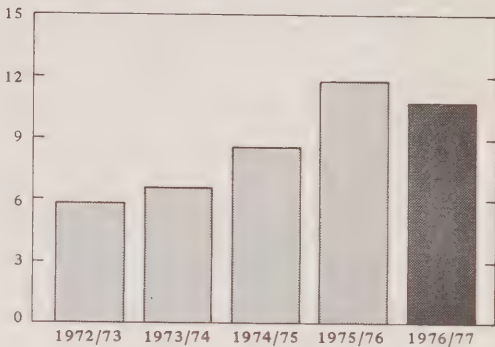

The Printing Services Branch is responsible for four activities — print procurement, publications distribution, duplicating and stationery supply services. The Print Procurement Section provides a graphic arts advisory service and purchases printing services from the private sector, as required by ministries and agencies. The Section is also responsible for the contracting for all legislative printing, including the Ontario Gazette, and the publication of the Ontario Government Telephone Directory.

PRINT PROCUREMENT SECTION

Number of printing tenders placed
(orders valued over \$1,000 only)

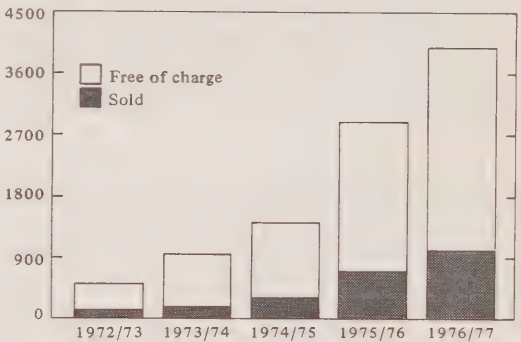

Value of all printing orders processed
(\$ Millions)

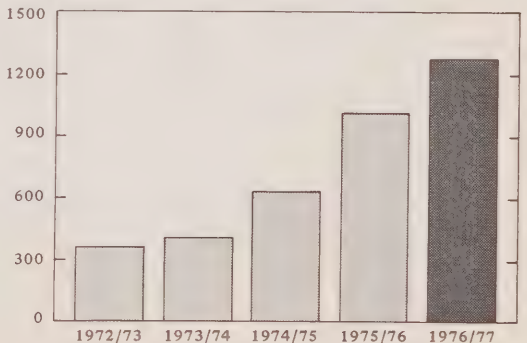

The Publications Service is responsible for distributing Ontario Government publications to the public and to ministries and agencies through outlets which include the Ontario Government Bookstore, the Publications Centre, and a province-wide library depository system.

PUBLICATIONS SERVICE

Number of publication copies distributed
(000)

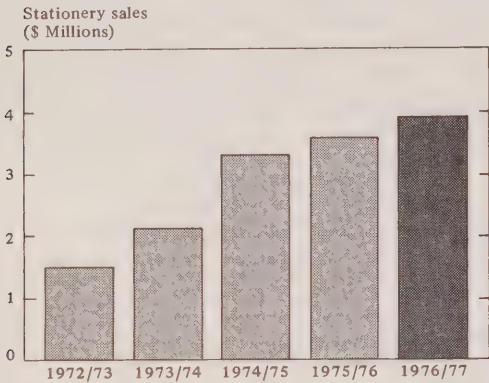

Value of publication copies sold
(\$000)

The Government Duplicating Service is the only large duplicating facility serving ministries and agencies in the Queen's Park area. During the fiscal year, this Section received a total of 10,500 requisitions for duplicating services which resulted in the production of 102 million copies, and a total sales volume of \$1,650,000.

The Government Stationery Service is available to ministries and agencies as a main supply centre for over 1,400 stationery and office supply items which are used by government offices in Queen's Park and throughout Ontario. Activities of this Section during the year included the implementation of an automated inventory management system.

GOVERNMENT STATIONERY SERVICE

Supply Administration Branch

The Supply Administration Branch comprises five sections, which provide a variety of supply services to ministries and agencies.

Three commodity sections — Furniture and Furnishings, Office Products, and Special Products — are responsible for purchasing goods and services in support of various operational requirements of the Ministry of Government Services. They purchase equipment for new Ontario Government facilities, and the Furniture and Furnishings Section contains the central purchasing authority for furniture and furnishings required by all ministries and agencies. In addition, the commodity sections are responsible for the administration of a collective purchasing program. This program involves the establishment of Collective Purchasing Agreements in cooperation with ministries and agencies, and, through economies of scale, provides for significant savings in the supply of commonly used commodities.

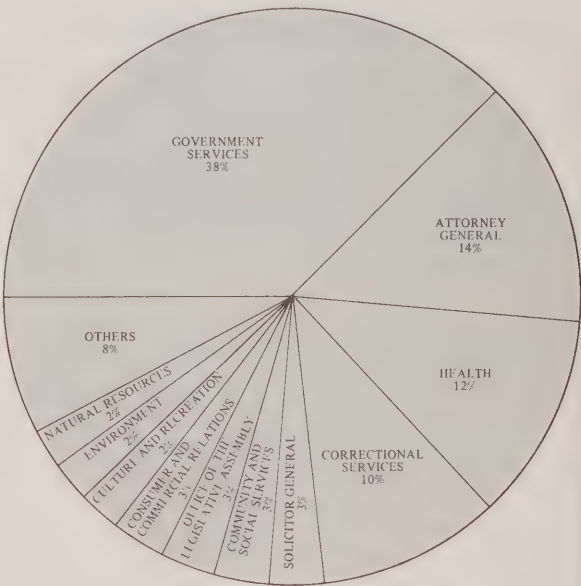

The Branch also performs a number of supply support functions which are the responsibilities of the Supplier Development Section and the Assets Disposal Service.

During the year, the commodity sections issued purchase orders representing a total value of \$12,247,000.

PURCHASING

Percentage value of purchases for ministries and agencies

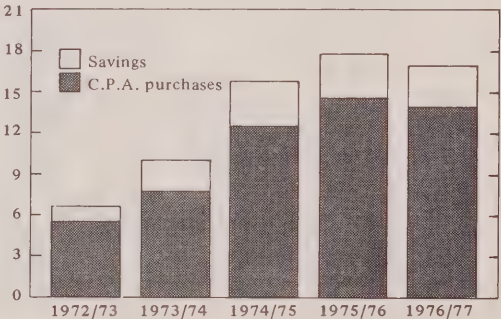

Total value of purchases — \$12,247,000

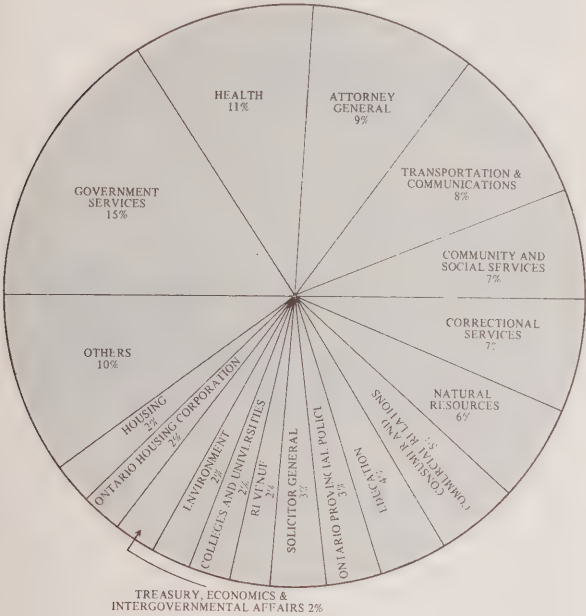

The collective purchasing program resulted in purchases by all ministries totalling \$13,969,000.

COLLECTIVE PURCHASING

Value of Collective Purchasing Agreements (\$ Millions)

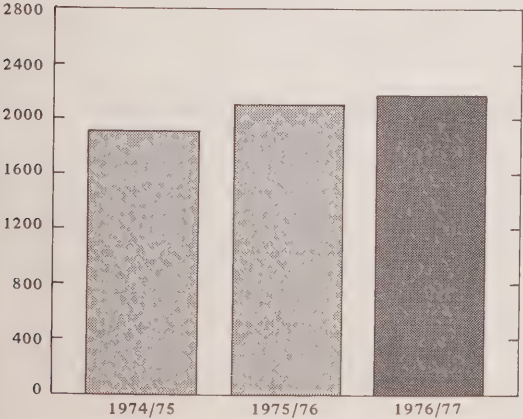

Percentage value of C.P.A. purchases by ministries and agencies
Total value of purchases – \$13,969,000

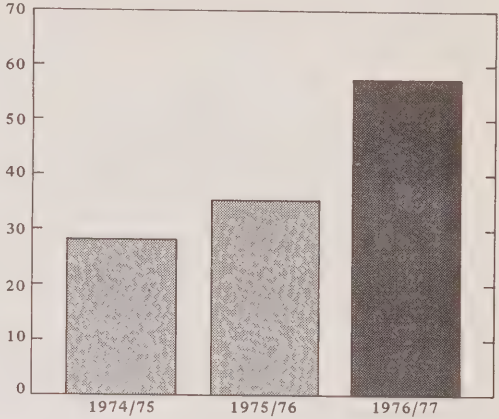

The Supplier Development Section is responsible for providing administrative support to the Branch by developing and maintaining a central supplier list, identifying and evaluating new suppliers and cataloguing products which are supplied to the government. This section also operates the Public Tenders Office, which provides a central tendering service to

PUBLIC TENDERS OFFICE

Number of tenders processed

(\$ Millions)

ministries and agencies to ensure fair competition in the awarding of government supply contracts.

The Assets Disposal Service receives, warehouses and arranges for the re-use or disposal of furniture, equipment and materials which have been declared surplus by ministries and agencies. Surplus assets are either allocated for re-use within the government as required, or disposed of by public tender or auction.

The total value of surplus assets re-used during the year was over \$1 million.

Special Services Branch

This Branch provides operational support to ministries and agencies through four specialized service units – the Government Mail Service, Central Collection Service, Repair and Trucking Service, and Records Centre.

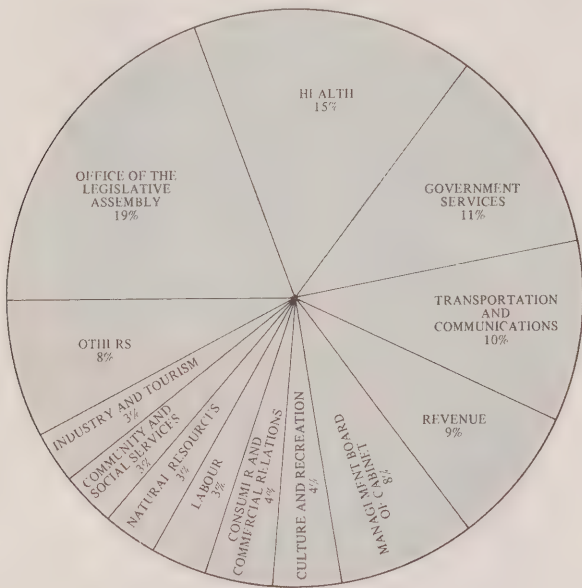

The Government Mail Service sorts and distributes most of the government mail for Queen’s Park and Metropolitan Toronto government offices. It also administers an economical mass mailing service which consists of operations such as high speed folding, addressing, inserting, sealing and metering.

Activities of the Government Mail Service during the fiscal year included the establishment of a courier service to facilitate the delivery of mail to government offices throughout the province; and the establishment of a “bag mail” service to ensure increased economies and efficiencies in the delivery of large volumes of mail between Queen’s Park and the Ontario Government’s consolidated office building in Thunder Bay.

GOVERNMENT MAIL SERVICE

Percentage of Mass Mail processed for ministries and agencies

Total Mass Mail processed – 46,561,500 pieces

The Central Collection Service offers assistance to client ministries in the collection of overdue accounts.

As of March 31, 1977-

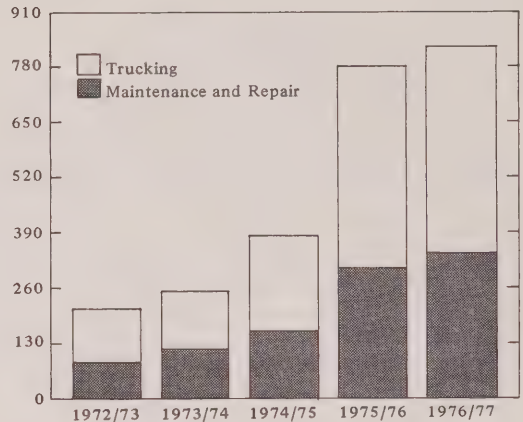

Number of accounts for collection	7,500
Dollar value of outstanding accounts	\$4,700,000
Dollar value of collections made	\$1,375,100

The Repair and Trucking Service carries out maintenance and repairs for vehicles and equipment of the Ministry of Government Services and offers a similar service to other ministries. The section offers a daily scheduled delivery service for mail, stationery and printing provided by the Ministry to over 100 government offices in Toronto. In addition, it offers a low cost trucking service to all ministries and agencies.

During the year, the Repair and Trucking Service assumed responsibility for the initial outfitting and servicing of new ambulances of the Ministry of Health, and for the ongoing maintenance of ambulances utilized throughout Metropolitan Toronto.

REPAIR AND TRUCKING SERVICE

Sales (\$000)

Administrative responsibility for the Records Centre was transferred to the Special Services Branch from the former Record Services Branch, effective April 1, 1976.

Located in Mississauga, the Records Centre provides storage facilities for inactive hard copy records, vital records, security copies of microfilm tapes and automatic data processing tapes. It also maintains liaison with the Archives of Ontario to ensure the safeguarding of records with long term research significance, or which relate to the history of Ontario.

The following refers to activities of the Records Centre during the fiscal year:

Records Centre holdings	174,978 cu. ft.
Records destroyed	21,954 cu. ft.
Records retrieved for ministries and agencies	46,418 cu. ft.

General Services Division

The General Services Division provides services of a corporate support nature to the daily operations of ministries, agencies and Members of the Legislative Assembly. Other Division services help facilitate communication between citizens and the Government of Ontario.

There are seven Branches in the Division, as well as two specialized service units – the Employee Advisory Service and Insurance and Risk Management.

Legislative Services Branch

The Legislative Services Branch provides efficient and expeditious operational maintenance and support services in the Legislative Building to the Lieutenant-Governor, Office of the Speaker, Office of the Premier, Members of the Legislature, Legislative Library, Legislative Press Gallery, Media Studio and visitors to the Legislative Building.

Responsibilities of the Branch include minor repairs and improvements, housekeeping, physical moving and relocations, vehicle parking, laundry services, messenger and steward services, and assisting in arrangements for special functions.

The Branch administers the Media Studio which provides Members of the Legislature with specialized facilities for news conferences and the taping and filming of reports, interviews and programs which are broadcast and telecast in provincial constituencies. The Media Studio is also utilized for the production of radio news releases concerning government policy and the dissemination of these releases to radio stations throughout Ontario.

During the fiscal year, a total of 84 news conferences were held in the Media Studio, and 329 radio news releases were produced and disseminated.

In addition, the Branch administered a number of projects designed to upgrade facilities and maintain the overall attractiveness of the Legislative Building. These included the installation of hand rails, emergency lighting and safety screens in the Legislative Chamber, office painting and electrical alterations, and the provision of new carpeting, draperies and curtains.

Employee Benefits Branch

Employee Benefits Branch administers a comprehensive benefits program for employees of the Ontario Public Service and certain designated agencies, boards and commissions in accordance with the Public Service Superannuation Act, Superannuation Adjustment Benefits Act, and various insurance plans. The Branch provides a service to the Office of the Assembly in assisting with a benefits program for Members of the Legislature, in accordance with the Legislative Assembly Retirement Allowances Act and other plans made available to Members.

The Branch is responsible for clearing contributions from all ministries for the Canada Pension Plan, Unemployment Insurance Commission and Ontario Health Insurance Plan. Additional functions include

liaising with insurance underwriters, assisting in the planning and formulation of policy for the combined benefits program, benefits counselling for current and retired government employees, and providing secretariat services for the Public Service Superannuation Board.

During the year, the Branch completed the conversion of employee benefits information to the computerized Integrated Payroll, Personnel and Employee Benefits System, which is administered by the Ministry of Government Services. In addition, the Branch reorganized its internal operations to achieve increased efficiencies in the administration of the employee benefits program. Such activity provided for the establishment of a number of new manual systems to facilitate the documentation and processing of benefits data, as well as the further development of the Branch's benefits counselling service and staff training programs.

The Branch continued to contribute to the development of government employee benefits policy and assist in the implementation of such policy in conjunction with various ministries and agencies.

Government Payments Branch

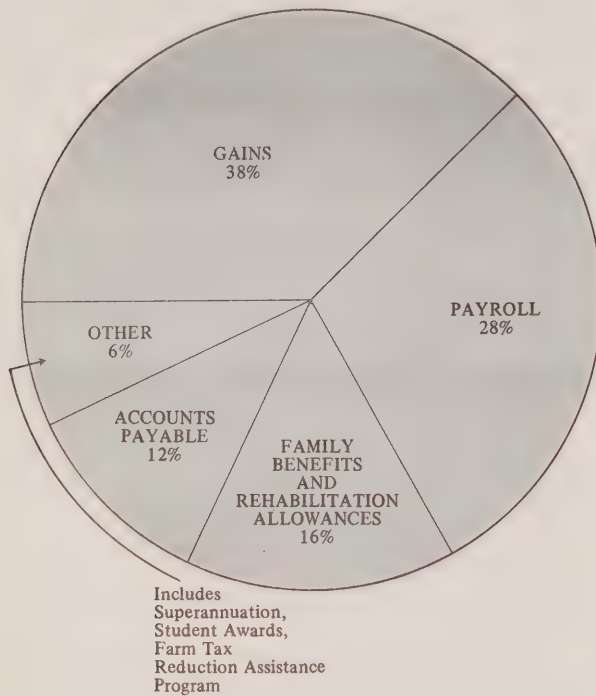

The Government Payments Branch is responsible for administering and recording government payments from the Consolidated Revenue Fund. Branch operations include the conversion of payments information into computer readable form prior to the production of cheques, as well as cheque writing, signing, enveloping and distribution. In addition, the Branch reconciles bank account balances, transfers funds between banks, and provides for the cancellation or replacement of lost or stale dated cheques.

During the year, the Branch processed a total of 9,000,000 cheques for programs including the Ontario Government Payroll, Accounts Payable, Guaranteed Annual Income Supplement Program (GAINS), Family Benefits and Rehabilitation Allowances, Superannuation, Farm Tax Reduction Assistance Program, and Student Awards.

In addition, the Branch introduced new computer equipment into its operations to ensure improved efficiency in cheque processing, and to assist in the processing of employee records and payments data for the Integrated Payroll, Personnel and Employee Benefits System and other government programs. The Branch also finalized planning for the further computerization of its cheque writing and reconciliation systems during the 1977/78 fiscal year.

GOVERNMENT PAYMENTS BRANCH

9,000,000 cheques processed
during fiscal year
ending March 31, 1977

Telecommunication Services Branch

Telecommunication Services Branch is responsible for providing ministries and agencies with a complete range of telecommunication services which include telephone, data communications, teletype, radio, intercom, facsimile, video transmission, satellite and related communication modes.

Common services provided by the Branch include consolidated telephone systems for Queen's Park and government offices in Metropolitan Toronto, the Court House and Land Registry Office in London, the Barrie Court House, and the Ontario Government Building, Thunder Bay. The Branch also administers the Inter City Network which provides toll free calling between Queen's Park and major government facilities throughout Ontario. On a typical day, the switchboard operators for these common telephone services handled approximately 20,000 calls. Savings in long distance charges and administrative costs real-

ized through the use of both services amounted to \$6.6 million during the year.

Additional Branch activity included coordinating the implementation of the Ontario Government's Communications Technology Satellite Program in conjunction with the Ministries of Natural Resources, Health, Environment, Solicitor General and Transportation and Communications.

Employee Data Services Branch

The Employee Data Services Branch administers the Integrated Payroll, Personnel and Employee Benefits System (IPPEBS) for the Ontario Government. The System is a central, computerized source of Ontario Government employee data which is supplied by the personnel and payroll units of each ministry and agency. It functions as the operational base for the production of government payroll cheques and provides for the efficient retrieval of payroll, personnel and employee benefits information required for administrative purposes.

During the year, the Branch completed the conversion of Ontario Government payroll and employee benefits information to IPPEBS, and implemented the initial conversion of employee attendance information to the System in conjunction with the Ministry of Natural Resources.

Additional activities of the Branch included the production and distribution of employee payroll and benefits information summaries throughout the government, and the expansion of its client liaison function which provides for the training of ministry and agency personnel involved in IPPEBS operations.

Protocol Services Branch

The Protocol Services Branch provides consultative and operational services to ministries and agencies with enquiries about protocol procedures and etiquette, and in response to requests for assistance in the organization and management of official visits, hospitality functions, public events and formal government conferences.

In addition, the Branch maintains official liaison with foreign consular representatives in Ontario, and works in support of the Technical Assistance Program of the Canadian International Development Agency by coordinating the study programs of foreign students receiving career training within the Government of Ontario.

The Branch prepares, records and microfilms official documents issued under the Great Seal of Ontario, the Privy Seal of the Lieutenant-Governor and the Ministry of Government Services Seal. It also prepares congratulatory scrolls for presentation to Ontario citizens in recognition of ninetieth or succeeding birthdays, fiftieth or succeeding wedding anniversaries, significant individual accomplishments and special jubilees.

During the year, the Branch coordinated arrangements on behalf of ministries, agencies and government officials who participated in activities associated with the Games of the Twenty-First Olympiad, including the Royal Visit to Kingston and Upper Canada Village, and the Olympiad for the Physically Disabled in Toronto. The Branch also coordinated arrangements for 61 official visits to Ontario, 98 hospitality functions, 45 public events and 21 conferences.

A total of 24,072 official documents were processed, and 8,716 congratulatory scrolls were prepared for presentation to Ontario citizens.

Employee Health Services Branch

The Employee Health Services Branch administers an occupational health program for employees of the Ontario Government through sixteen Health Centres located at Queen's Park and throughout Metropolitan Toronto. These Centres provide emergency and non-emergency medical care services, physical examinations, immunizations, consultation services for personal health problems, health education, and referrals to medical services in the community. The Branch is also responsible for screening new employees for tuberculosis, providing medical treatments for employees with problems related to alcohol and drug addiction, advising management on matters such as the performance of employees with health problems, and maintaining proper hygienic conditions in government facilities.

During the year, health services were provided through the Branch to a total of 64,471 government employees. The Branch also administered the establishment of a new Health Centre in the head office of the Ministry of Revenue, and assumed responsibility for the operation of the employee health facility formerly administered by the Ministry of Health at Resources Road, Toronto.

Employee Advisory Service

The Employee Advisory Service provides counselling and referral services to employees in cases where alcoholism, drug addiction or other social problems are affecting individual work performance. It also assists in the planning of training programs to enable supervisors to deal more effectively with social problems. In addition, the Unit offers counselling and referral services to assist government employees in attaining day care for their children.

Insurance and Risk Management

The Insurance and Risk Management Unit administers insurance and risk management programs, purchases insurance for the government, and provides ministries and agencies with expertise to develop, implement and maintain controls over risk exposure and loss prevention.

During the year, the Unit continued to utilize tendering procedures to obtain government-wide insurance coverage so that premium savings might be realized in the purchase of road liability, general liability and automobile fleet insurance. New policies were also negotiated to provide coverage for individual ministry programs.

Further studies were initiated to determine whether certain existing insurance policies could be cancelled in accordance with the Ontario Government's policy to self-insure against risks to physical assets. In addition, the Unit developed new forms for the documentation of third party and physical damage losses, to facilitate a study of costs associated with the government's self insurance program.

Management and Information Services

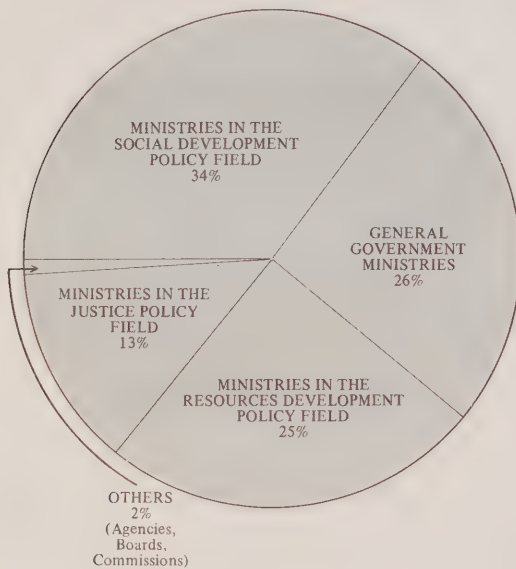

The Management and Information Services Program provides management consulting, systems development and computer services to ministries and agencies of the Ontario Government. This Program is somewhat unique in government since it provides services on a charge-back basis, in competition with the private sector.

The Program is organized into three Divisions — Management Consulting Services, Computer Services and Systems Development Services.

MANAGEMENT AND INFORMATION SERVICES

Percentage of revenue by Policy Field

Total Program revenue — \$23,524,000

Management Consulting Services Division

The Management Consulting Services Division provides a wide range of professional consulting services to assist ministries and agencies in solving complex management problems.

Designed to improve the overall public administrative practice within the Ontario Government, services of the Division have been developed to include multi-disciplinary skills and extensive practical experience in the field of management. The span of disciplines includes business administration, economics, industrial engineering, behavioural sciences, information systems, computer science, operations research and actuarial science.

Services are provided through two areas of operation — Organization and Human Resources Management and Planning and Information Services. During the fiscal year resources of the Division were applied to a total of 107 projects at the request of ministries and agencies.

Systems Development Services Division

The Systems Development Services Division provides ministries and agencies with a variety of services related to the application of data processing and manual information systems to government operations. These services are designed to facilitate management decision-making in areas of policy evaluation and development.

The Division offers services in the areas of computer programming, systems analysis and design, conversion and user education, project management and systems maintenance. The Division also assists clients in acquiring more specialized technical capabilities from private sector consulting and programming firms.

During the year, project direction was provided by the Division for a total of 298 projects for various ministries and agencies. Major projects included assisting in the implementation of the Integrated Payroll, Personnel and Employee Benefits System for the Ontario Government, implementing the Tenant Placement System in conjunction with the Ministry of Housing, and participating in the development and implementation of the Subscriber Administration System in conjunction with the Ministry of Health.

Computer Services Division

The Computer Services Division provides computer services in support of the operational programs and service-delivery functions of ministries and agencies of the Ontario Government.

The Division consists of three computing centres, located in Queen's Park, Downsview, and Leaside, as well as the Computer Systems Planning Branch, which is a source of technology planning and computer systems support systems.

During 1976/77 the Division completed the implementation of significant technological changes designed to increase and improve the overall operational capabilities of each of the computing centres. The Division also undertook extensive planning to ensure the continued provision of efficient and effective computer services to the government in future years.

Accommodation

Accommodation Program

The Accommodation Program provides accommodation facilities for Ontario Government ministries and agencies. This objective is achieved through the provision of a comprehensive range of related services by five Branches — Planning and Research, Design Services, Program Management, Realty Services, and Property Management.

Planning and Research Branch

The Planning and Research Branch is responsible for allocating government space to ministries and agencies, and for long-term government accommodation planning.

During the fiscal year, the Branch implemented accommodation changes for most ministries and agencies, which included the provision of new accommodation for two ministries at 77 Bloor Street West, Toronto. The Branch also carried out the planning for head office accommodation in Toronto and the establishment of regional and district office accommodation throughout Ontario, for the new Ministry of Northern Affairs. Planning studies were completed for an addition to a consolidated government office building in Kenora, and plans were developed for con-

solidated government facilities in Hamilton, Whitby, Timmins, Sault Ste. Marie, and Sudbury.

Major research activities of the Branch included undertaking a study for the head office relocations of two ministries, continuing participation in a study of the Ontario Government vehicle parking policy, and in the development of a computerized government accommodation information system.

Additional activities included reviewing requests for office and special purpose space, surveying ministries for the possible utilization of surplus land, and reviewing government space standards in conjunction with various ministries and the Management Board Secretariat.

Design Services Branch

The Design Services Branch is responsible for the control of all phases of architectural and engineering design, construction supervision, and the provision of furniture and equipment for all accommodation projects of ministries. Design consulting services are provided for other ministries as required, as well as for the Ministry of Government Services.

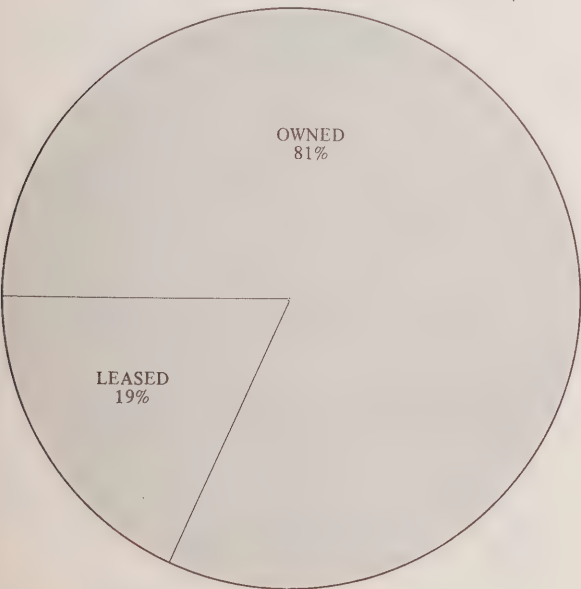

During the year, the Branch was involved in 196 major projects and 223 minor projects which progressed through various stages of design and construction. These projects represented a total expenditure of \$68,700,000.

Projects undertaken for the Ministry of Agriculture and Food included the construction of a gymnasium and auditorium, and renovations to the Animal Science Building, at the College of Agricultural Technology, Kemptville. Completed projects included a Swine Breeding Barn in Ridgetown, and the Ontario Agricultural Museum near Milton.

Ministry of Health projects which got under way included Phase Three of reconstruction at the Queen Street Mental Health Centre in Toronto, and the construction of a standpipe system at the St. Thomas Psychiatric Hospital. Completed were a new School Building at the Thistletown Regional Centre for Children and Adolescents in Rexdale, and kitchen alterations at the Psychiatric Hospitals in Kingston and Whitby. Renovations of the Auchmar Building continued at the Hamilton Psychiatric Hospital.

Construction of an addition to the District Office Building in Cochrane was started for the Ministry of Natural Resources. Projects completed for the Ministry included Regional Service Centres in Dryden and Thunder Bay, a District Office in Atikokan, and a Fish Rearing Sub-Station near Dorion.

GOVERNMENT BUILDINGS LEASED AND OWNED
Total area of buildings — 39,658,000 sq. ft.

For the Ministry of Transportation and Communications, construction was completed of a District Services Building in Huntsville, a District Office Building, Services Building and Garage in New Liskeard, and materials and equipment storage yards in North Bay.

Two projects initiated for the Ministry of Community and Social Services were the provision of a ward ventilation system at the Rideau Regional Centre, Smiths Falls, and a laundry building ventilation system at the Huronia Regional Centre, Orillia.

Projects for the Ministry of the Environment included a Regional Laboratory in Thunder Bay, and renovations to the laboratory buildings in Etobicoke.

An air-tempering system was started for the Ministry of Correctional Services at the Ottawa-Carleton Detention Centre, and the construction of Regional Detention Centres continued in London, Hamilton and Toronto.

Construction of Court House and Registry Office facilities was started in Brampton and Milton, for the Ministries of the Attorney General and Consumer and Commercial Relations, while construction of a Court House and Registry Office neared completion in Kitchener. Completed was the Court House in Barrie.

In Tillsonburg, an O.P.P. Detachment Building was completed for the Ministry of the Solicitor General, while construction of the Ontario Police College continued in Aylmer.

Additional projects started during the year included a Student Services Centre for the Ministry of Education in Belleville, Sewage Treatment Plant at McFarlane Lake, and facilities for the handicapped at the Legislative Building, Queen's Park. Construction of Ontario Government Buildings progressed in Windsor and Dryden.

Program Management Branch

The Program Management Branch is responsible for the planning, budgeting, scheduling and overall client liaison necessary for the effective provision of accommodation facilities for the Ontario Government.

The Branch serves as the prime liaison with client ministries and coordinates accommodation projects related to capital accommodation, land acquisition for capital projects, leasing, lease-purchase and accommodation alterations.

During the year the Branch coordinated a total of 916 different accommodation projects for the various ministries of the government and managed the related

funds which totalled approximately \$82,000,000 for the year.

ACCOMMODATION PROJECTS COORDINATED

— Capital Construction Projects	— 465
— Lease-Purchase Projects	— 4
— Accommodation Alteration Projects	— 230
— New Leases	— 214
— Land Acquisition for Capital Projects	— 3
	<u>916</u>

Realty Services Branch

The Realty Services Branch provides realty services for most government ministries, including the Ministry of Government Services accommodation program. These services include the appraisal, negotiation and acquisition of land and buildings; land surveys, the leasing of office space, disposal of surplus properties, and the interim management of government-owned properties.

In addition, the Branch maintains inventories of government properties and administers the Government of Ontario Employee Home Owner Assistance Plan, which is designed to assist employees who, through organizational change, are moved from one locality to another. The Branch also provides an advisory service to Boards, Commissions and Crown Agencies on real estate matters.

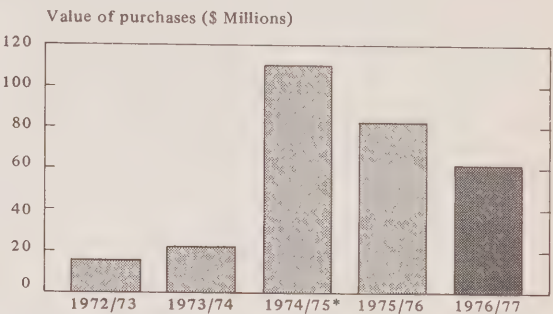

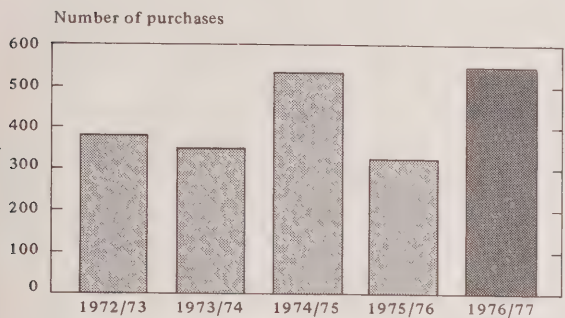

Major Branch activities during the year continued to include the acquisition of properties throughout the province for the Ministries of the Environment and Housing, and the acquisition of properties in the Parkway Belt West for Ontario Hydro and the Ministry of Transportation and Communications. The Branch also administered the sale of an increased number of surplus properties, including housing units formerly rented by government employees.

Interim management continued to ensure the effective short term utilization of government-owned properties until required for development. Such properties included land and buildings acquired in the Parkway Belt West, and for the Government Townsites Program of the Ontario Housing Corporation and the Ontario Land Corporation.

Approximately 1,700 properties were under interim management during the year. A total of 1,434 of these properties were leased by the Branch providing \$2,700,000 in rental income.

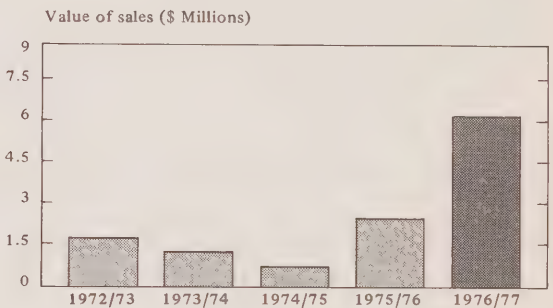

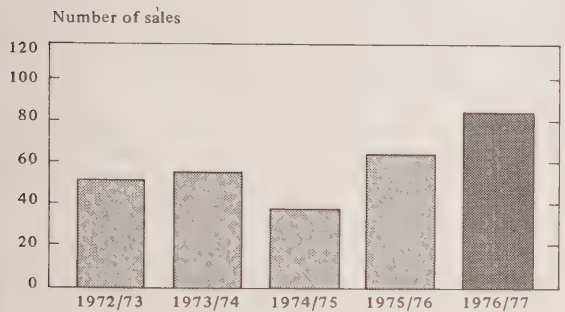

COMPLETED REALTY TRANSACTIONS

PURCHASES

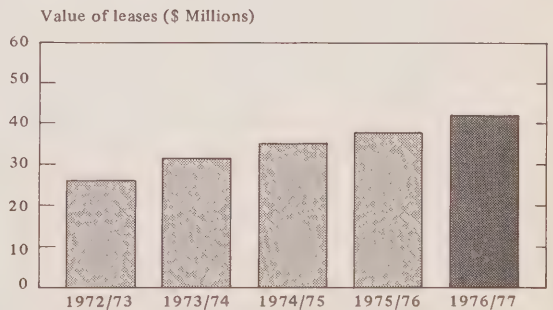

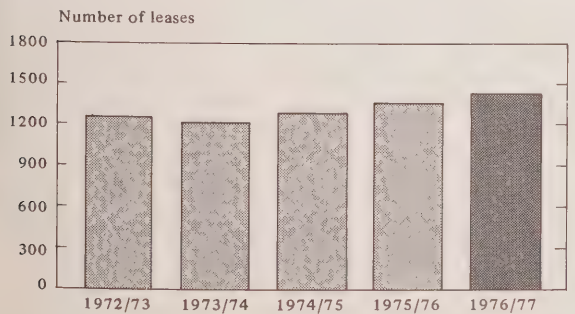

*Increase in purchases during 1974/75 is primarily due to acquisitions for the Parkway Belt West and Government Townsites.

Property Management Branch

The Property Management Branch provides operational maintenance and repair services to government-owned buildings through twelve Regional and four Field Area offices, which are located throughout Ontario.

The Branch is responsible for the servicing and repair of building structures; heating, ventilating, air conditioning and electrical systems; the provision of cleaning, security and grounds maintenance; and common administrative services in consolidated government office buildings.

In addition, the Branch is responsible for the tendering and construction of minor capital projects, as well as alterations and improvements for both leased and government-owned buildings.

Other services include the administration of the Ministry's safety program to ensure safe conditions in government buildings and on building construction sites; coordination of displays by various ministries at the London, Ottawa and Thunder Bay exhibitions; and the tendering and administration of catering contracts for cafeterias and vending machine operations in Provincial Court Houses and office buildings occupied by government ministries.

During the year, the Branch continued its active involvement in a program of energy conservation within Ontario Government buildings.

The total expenditure for all services in the 1976/77 fiscal year was \$51,942,000.

Ministry of Government Services

Annual Report

Fiscal year ending March 31, 1978

Ministry of Government Services Annual Report

Fiscal year ending March 31, 1978

Ministry of
Government
Services

*To Her Honour, The Lieutenant-Governor of
The Province of Ontario*

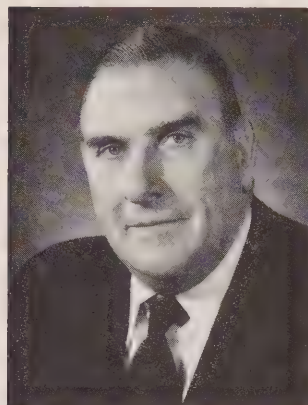

MAY IT PLEASE YOUR HONOUR:

I have the privilege of presenting for the information
of Your Honour and the Legislative Assembly, the
Annual Report of the Ministry of Government
Services for the fiscal year beginning April 1, 1977
and ending March 31, 1978.

Respectfully submitted,

A handwritten signature in dark ink, reading "Lorne C. Henderson".

LORNE C. HENDERSON,
Minister.

*The Honourable Lorne C. Henderson,
Minister of Government Services*

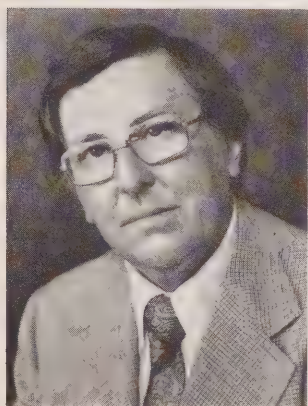

SIR:

I have the honour to submit for your approval the
1977/78 Annual Report of the Ministry of
Government Services.

Respectfully submitted,

A handwritten signature in dark ink, reading "J. C. Thatcher".

J. C. THATCHER,
Deputy Minister.

MINISTRY OF GOVERNMENT SERVICES

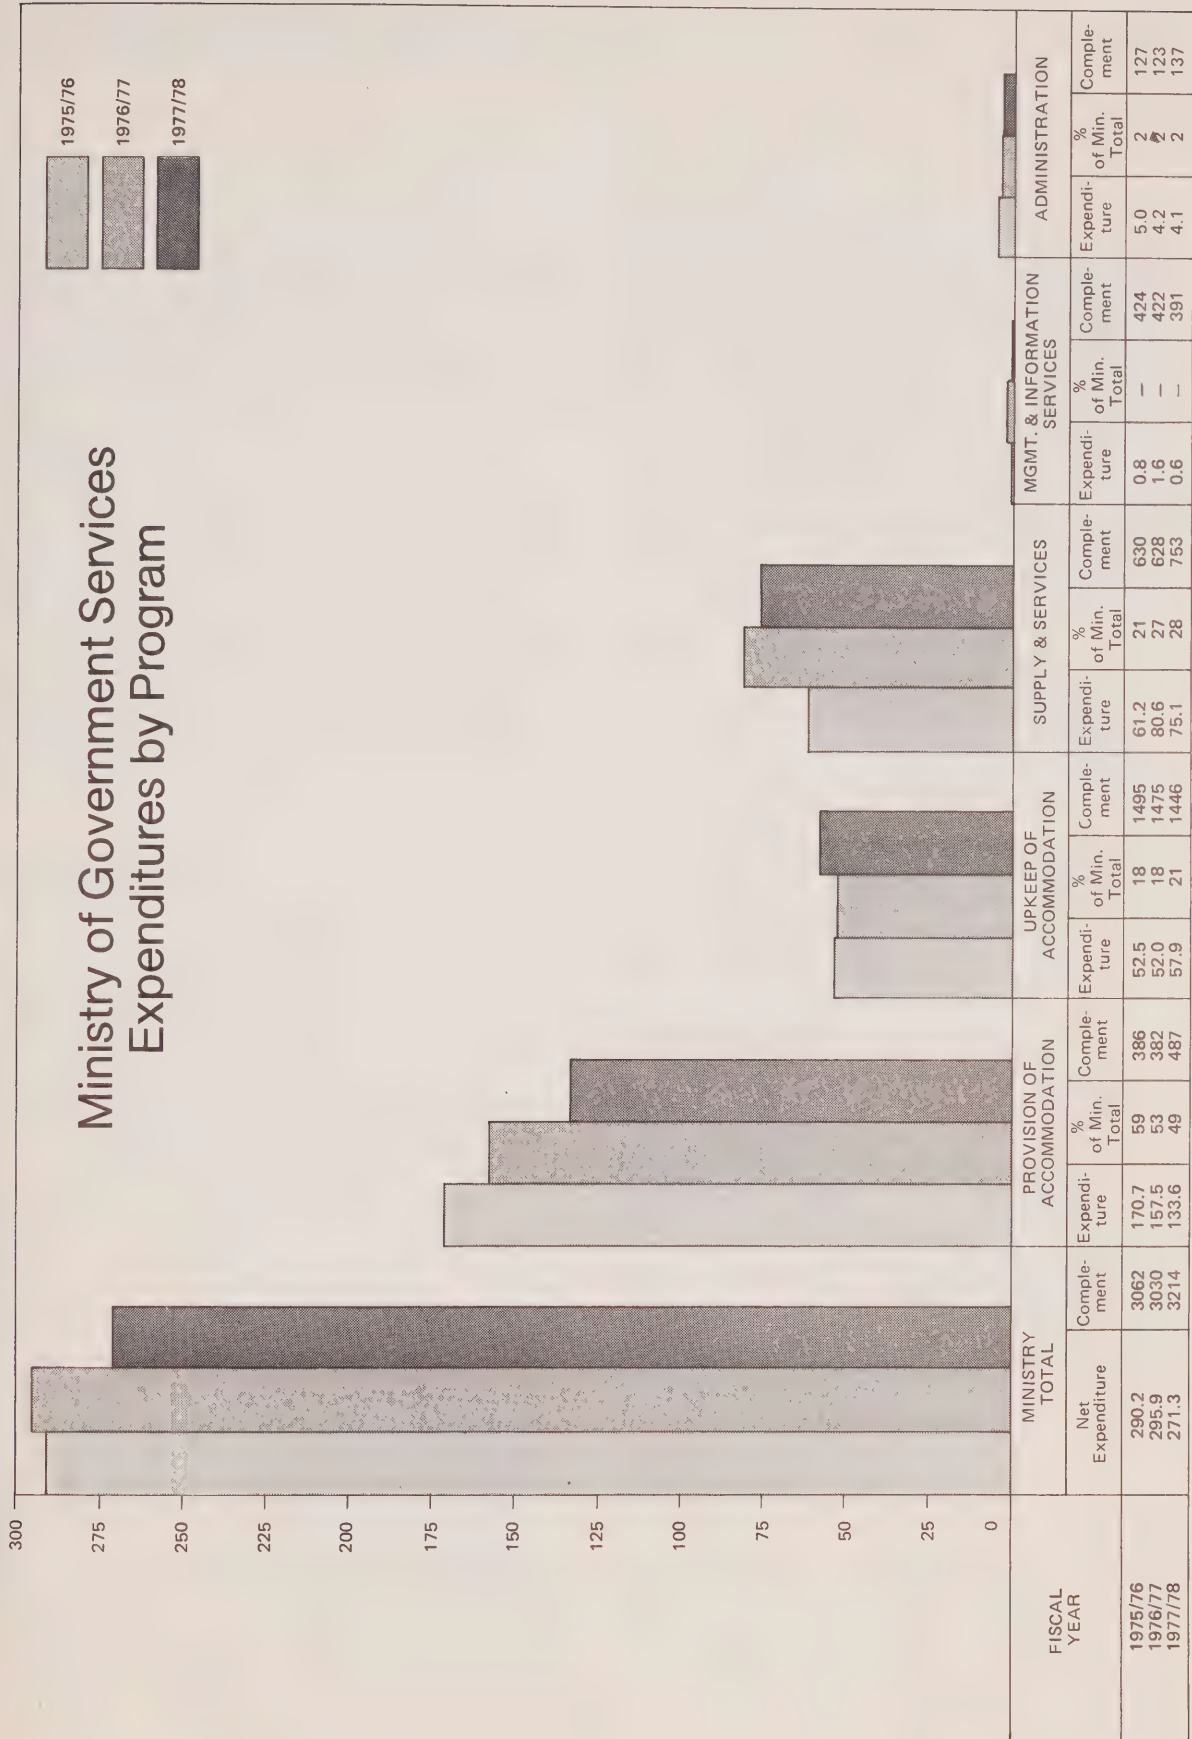

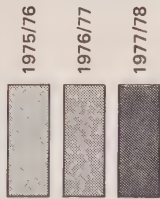

BASIC ORGANIZATION
REPORTING TO
THE MINISTER OF
GOVERNMENT SERVICES
MARCH 31, 1978

* Legal Services provided by the Ministry of the Attorney General

\$
Millions

Ministry of Government Services Expenditures by Program

Administration Division

The Administration Division provides administrative support services and professional expertise in all aspects of the Ministry's administrative process.

The Division consists of four Branches — Audit, Finance, Personnel and Administrative Services — and provides administrative direction to the Legal Branch.

Audit Branch

The Audit Branch is responsible for providing management with objective assessments of the financial and internal controls under which Ministry programs and activities operate.

During the year, the Branch continued its multi-year program of auditing all major activities in the Ministry. In particular, the Branch's System Audit Group conducted audits on a number of large Ministry systems. The Branch also provided special audit services as requested by senior management of the Ministry.

Finance Branch

The Finance Branch processes and records financial transactions of the Ministry, prepares financial reports relative to Ministry operations, and provides financial management and accounting systems support to program managers. The Branch also maintains financial control over Ministry assets and advises on transactions of a financial nature, as required.

Branch activities during the year included expanding and restructuring a number of its computerized financial systems, to ensure the efficient provision of financial information to program managers.

Personnel Branch

This Branch contributes to the achievement of Ministry goals by providing personnel services in the following areas: recruitment, classification, staff development, the Affirmative Action-Equal Opportunity Program, industrial relations and administration.

During the year, the Branch supported Ministry operations by arranging for the recruitment of suitably qualified applicants for regular and contract positions. The Branch ensured that positions were appropriately described and classified, and that employees were properly compensated for work performed. Through staff development, a number of employees benefited from activities designed to help develop their full potential, such as job related training courses.

The Ministry's Affirmative Action-Equal Opportunity Program offered help to all employees in establishing and attaining career objectives. The Program implemented employee job rotation in the Ministry and organized career development seminars. It also provided for career counselling, the regular publication of its newsletter, "Equilibrium", and the administration of a Career Information Centre.

In addition, the Branch made industrial relations expertise available to Ministry managers for matters involving the Ontario Public Service Employees Union.

On March 31, 1978, the Ministry had an approved complement of 3,214 employees, and there were 254 employees in the unclassified service.

Administrative Services Branch

The Administrative Services Branch provides a variety of general administrative services in support of Ministry programs.

Responsibilities of the Branch include records and forms management activities, visual identity enquiries, surplus assets reallocation, parking allocation, telephone listings and billings, publication subscriptions, identity cards and a central petty cash fund.

Legal Branch

Legal Services are provided by the Ministry of the Attorney General; however, for administrative purposes this Branch is a part of the Administration Division.

The Legal Branch ensures the legality of the Ministry's operations and serves the needs of the various programs of the Ministry. It performs legal functions connected with the purchase, expropriation, leasing and sale of property; contracts; collections; claims; writs; affidavits; Orders-in-Council; drafting of legislation; providing legal opinions, and appearing before courts and administrative tribunals for hearings and trials.

Management Planning Branch

The Management Planning Branch is responsible for the development and support of the Ministry's corporate planning and control systems, and also provides executive assistance to the Deputy Minister.

Major activities of the Branch include the continuing analysis of the Ministry's program activities to ensure consistency with government policy and Ministry goals and objectives, and Ministry liaison with Management Board Secretariat concerning policies and program proposals. The Branch also provides coordination for all systems projects of the Ministry, develops and arranges for the publication and distribution of Ministry policies and procedures, and provides public relations and information services in support of Ministry programs to other ministries, the news media and the public.

During the year, a plan for Ministry programs was developed for implementation in the 1978/79 fiscal year. A number of proposals were prepared and submitted for Management Board approval, and the

Branch continued to administer the Performance Evaluation System, which is designed to measure the effectiveness of Ministry programs. Coordination was provided for various Ministry systems projects including the development and implementation of a computerized cheque writing and reconciliation system. In addition, policies and procedures were developed and distributed for the guidance of Ministry managers.

Four issues of the Ministry's publication, "SPEC-TRUM", were produced to keep employees progressively informed on Ministry activities, and 78 News Releases were produced and distributed. Public relations and information services were provided for a total of 48 public events involving the Ministry, which included official visits to Ontario, official opening and sod-turning ceremonies throughout the province, and cultural presentations at Queen's Park.

The Branch continued to provide executive assistance to the Deputy Minister in a variety of matters during the year.

Supply and Services

The Supply and Services Program covers a diverse range of administrative support functions required by all Ontario Government ministries and agencies. The Program facilitates the efficient and economical procurement of purchased goods and services, as well as the provision of several essential internal administrative services.

Supply and Services consists of ten Branches and two smaller Units, which are organized into the Marketed Services Division and General Services Division.

Marketed Services Division

The main responsibility of the Marketed Services Division is to supply certain commonly required goods and services to ministries and agencies at cost and service levels superior to those of competing sources of supply. The Division objective is to achieve efficiencies and economies of scale in competition with commercial and alternative Ontario Government supply sources.

There are three Branches in the Division — Printing Services, Supply Administration and Special Services.

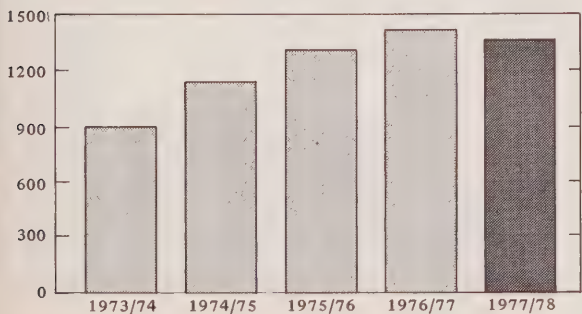

Printing Services Branch

The services of this Branch are provided through four Sections — Print Procurement Service, Publications Service, Government Duplicating Service, and Government Stationery Service.

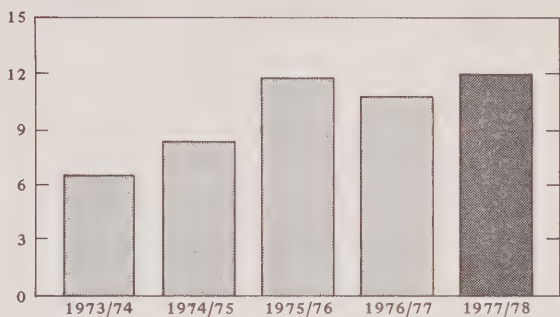

The Print Procurement Service offers a comprehensive graphic arts service to all ministries and agencies, which includes assisting in the development of specifications, calling tenders, and purchasing printing services from the graphic arts industry. The Section is also responsible for the contracting for all legislative printing, the Ontario Gazette, and the Ontario Government Telephone Directory.

PRINT PROCUREMENT SERVICE

Number of printing tenders called
(orders valued over \$1,000 only)

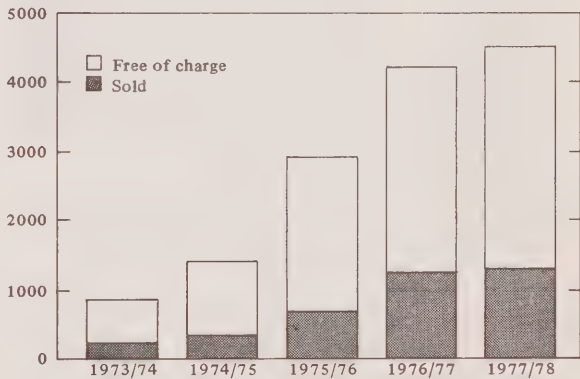

Value of all printing orders processed
(\$ Millions)

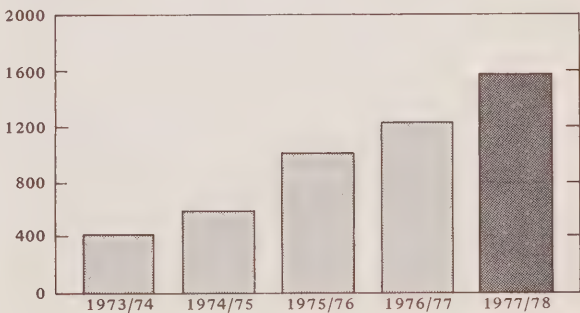

The Publications Service is responsible for cataloguing, warehousing and distributing all Ontario Government publications. Publications are distributed through outlets which include the Ontario Government Bookstore, the Publications Centre, and a province-wide library depository system.

PUBLICATIONS SERVICE

Number of publication copies distributed
(000)

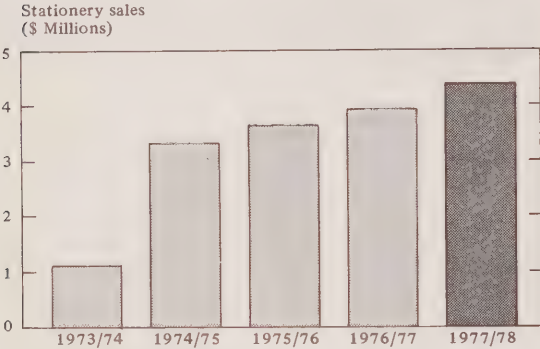

Value of publication copies sold
(\$000)

The Government Duplicating Service is the only large duplicating facility serving the Queen's Park area, and offers ministries and agencies expeditious duplicating services at competitive costs. During the fiscal year, this Section processed some 10,000 orders for duplicating services, which resulted in the production of over 100 million copies and a total sales volume of approximately \$1,500,000.

The Government Stationery Service is responsible for the competitive purchasing, warehousing, retail marketing and distribution of some 1,400 stationery and office supply items which are used in government offices at Queen's Park and throughout Ontario. The Section provides an optional stationery supply service to ministries and agencies, and operates on a full cost-recovery basis.

GOVERNMENT STATIONERY SERVICE

Supply Administration Branch

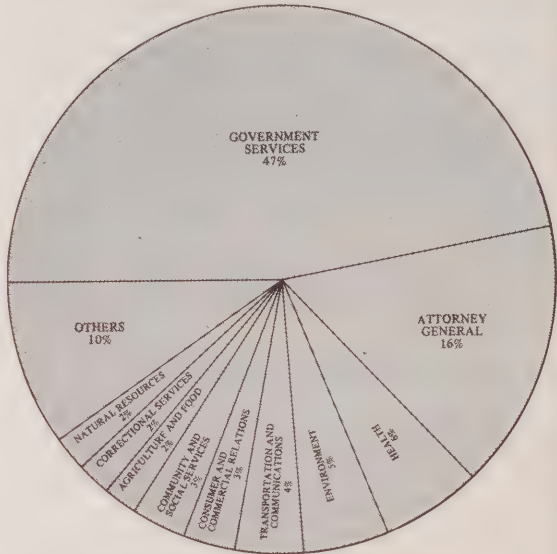

The Supply Administration Branch comprises five sections, which provide a variety of supply services to ministries and agencies.

Three commodity sections – Furniture and Furnishings, Office Products, and Special Products – purchase goods and services in support of the various operational requirements of the Ministry of Government Services. They purchase equipment for new Ontario Government facilities, and the Furniture and Furnishings Section is the central purchasing agency for furniture and furnishings required by all ministries and agencies. An additional responsibility of the commodity sections is the administration of a collective purchasing program. This program involves the establishment of Collective Purchasing Agreements in cooperation with ministries and agencies, and through economies of scale, provides for significant savings in the supply of commonly used commodities.

The Branch also performs a number of supply support functions, which are the responsibility of the Supplier Development Section and the Assets Disposal Service.

During the year, the commodity sections issued purchase orders representing a total value of over \$12,435,000.

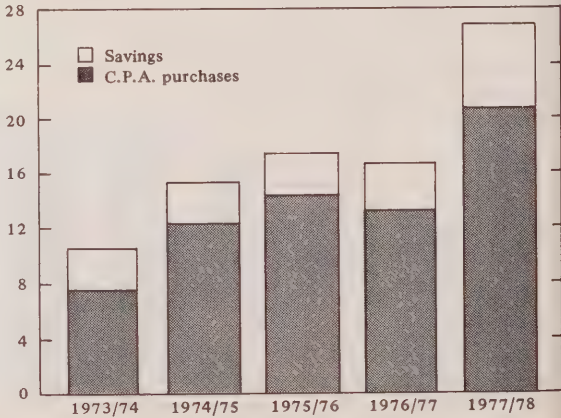

PURCHASING
 Percentage value of purchases for ministries and agencies
 Total value of purchases – \$12,435,000

The collective purchasing program resulted in purchases by all ministries totalling \$21,769,000.

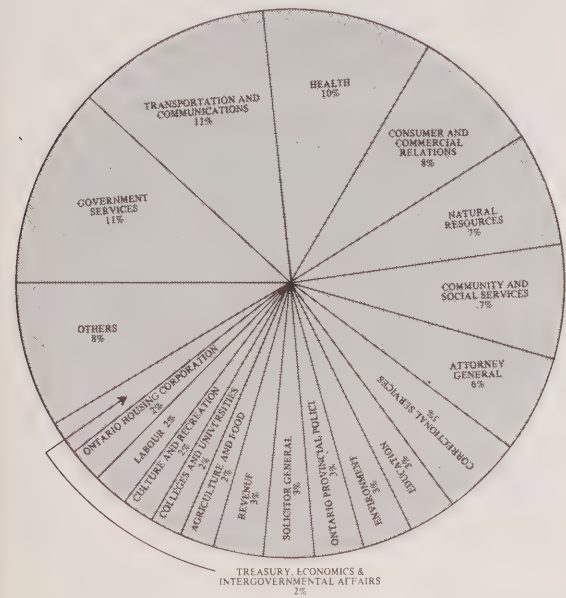

COLLECTIVE PURCHASING

Value of Collective Purchasing Agreements (\$ Millions)

Percentage value of C.P.A. purchases by ministries and agencies

Total value of purchases – \$21,769,000

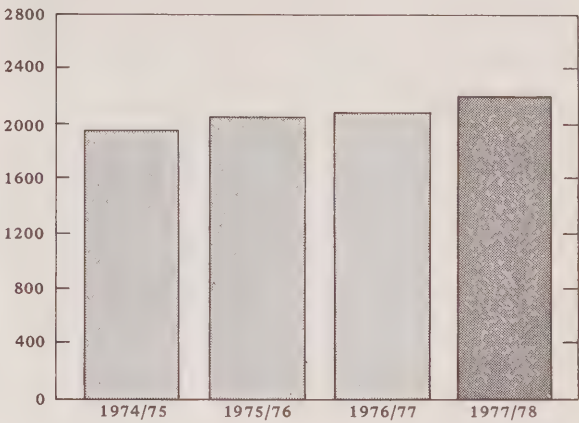

The Supplier Development Section is responsible for providing administrative support to the Branch by developing and maintaining a central supplier list, identifying and evaluating new suppliers and cataloguing products which are supplied to the government. The Section also operates the Public Tenders Office, which offers a central tendering service to ministries and agencies to ensure fair competition in the awarding of government contracts.

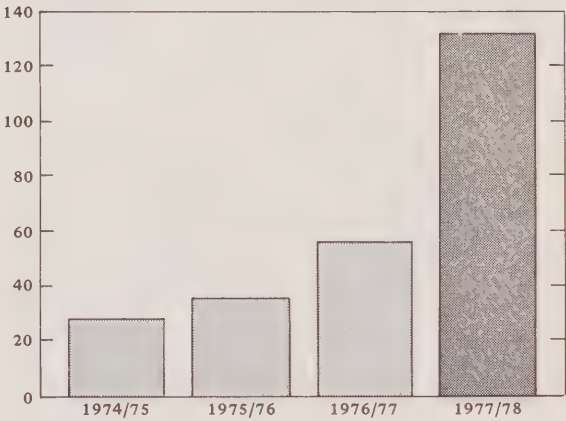

Activities of this Section included the establishment of computerized data processing systems to provide for increased efficiencies in the handling of supplier and purchasing information, and the production of a revised and improved Furniture and Furnishings Catalogue. The Public Tenders Office processed a total of 2,286 tenders in various categories which resulted in \$133,200,000 in contract awards.

PUBLIC TENDERS OFFICE

Number of tenders processed

Value of tenders processed (\$ Millions)

The Assets Disposal Service receives, warehouses and arranges for the re-use or disposal of furniture, equipment and materials which have been declared surplus by ministries and agencies. Surplus assets are either allocated for re-use within the government as required, or disposed of by public tender.

The total value of surplus assets re-used during the year was approximately \$1,149,000.

Special Services Branch

This Branch provides operational support to ministries and agencies through four specialized service units – the Government Mail Service, Central Collection Service, Repair and Trucking Service, and Records Centre.

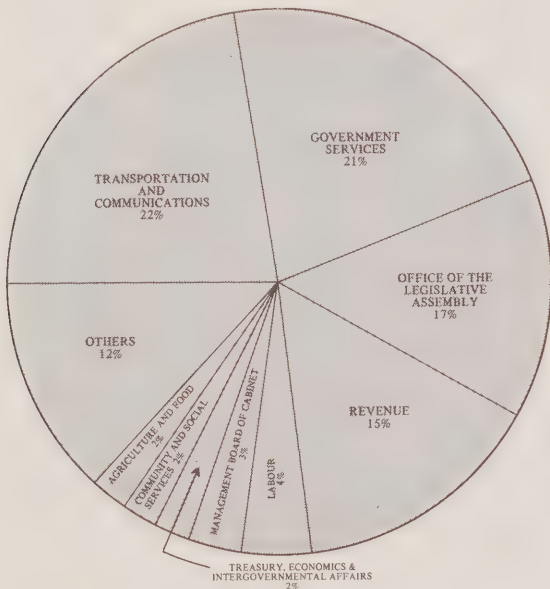

The Government Mail Service sorts and distributes most of the government mail for Queen's Park and Metropolitan Toronto government offices. It also administers an economical mass mailing service which consists of operations such as high speed folding, addressing, inserting, sealing and metering.

Other activities include providing a "bag mail" service to ensure the efficient and economical delivery of large volumes of mail between Queen's Park and the Ontario Government's consolidated office building in Thunder Bay. In addition, the Government Mail Service administers a courier service for mail addressed to provincial government offices, and on an ongoing basis, provides ministries and agencies with information relative to changes in Canada Post Office rates and services.

GOVERNMENT MAIL SERVICE

Percentage of mass mail processed for ministries and agencies

Total mass mail processed - 48,049,200 pieces

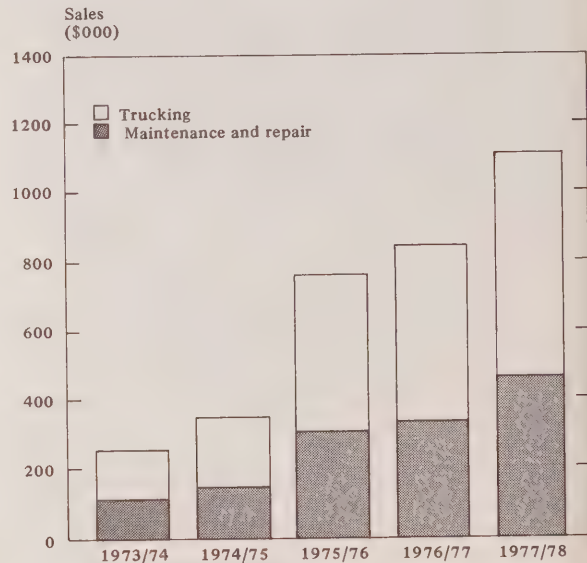

The Central Collection Service offers assistance to client ministries in the collection of overdue accounts.

As of March 31, 1978 -	
Number of accounts for collection	7,357
Dollar value of outstanding accounts	\$5,199,500
Dollar value of collections made	\$1,507,000

The Repair and Trucking Service maintains and repairs vehicles and equipment of the Ministry of Government Services and offers a similar service to other ministries. This responsibility includes the initial outfitting and servicing of new ambulances for the Ministry of Health, and the continuing maintenance of ambulances utilized throughout Metropolitan Toronto.

The Section offers a daily scheduled delivery service for mail, stationery and printing provided by the Ministry of Government Services to over 100 government offices in Toronto. In addition, it offers a low cost trucking service to all ministries and agencies.

REPAIR AND TRUCKING SERVICE

Located in Mississauga, the Records Centre provides storage facilities for inactive hard copy records, vital records, security copies of microfilm tapes and automatic data processing tapes. It also maintains liaison with the Archives of Ontario to ensure the safeguarding of records with long term research significance, or which relate to the history of Ontario.

The following refers to activities of the Records Centre during the fiscal year:

Records Centre holdings	185,664 cu. ft.
Records destroyed	26,205 cu. ft.
Records retrieved for ministries and agencies	74,717 retrievals

General Services Division

The General Services Division provides services of a corporate support nature to the daily operations of ministries, agencies and Members of the Legislative Assembly. Other Division services help to facilitate communication between citizens and the Government of Ontario.

There are seven Branches in the Division, as well as two specialized service units – the Employee Advisory Service, and Insurance and Risk Management.

Legislative Services Branch

The Legislative Services Branch provides operational maintenance and support services in the Legislative Building to the Lieutenant-Governor, Office of the Speaker, Office of the Premier, Members of the Legislature, Legislative Library, Legislative Press Gallery, Media Studio, and visitors to the Legislative Building.

The Branch is responsible for minor repairs and improvements, housekeeping, physical moving and relocations, vehicle parking, laundry services, messenger and steward services, and assisting in arrangements for special functions.

The Branch administers the Media Studio which provides Members of the Legislature with specialized facilities for news conferences and the taping and filming of reports, interviews and programs which are broadcast and telecast in provincial constituencies. The Media Studio is also utilized for the production of radio news releases concerning government policy and the dissemination of these releases to radio stations throughout Ontario.

During the fiscal year, a total of seventy-six news conferences were held in the Media Studio, and 360 news releases were produced and disseminated.

Other Branch activities included administering the restoration of various works of art contained in the Ontario Government's historical art collection. This project was carried out in conjunction with the Design Services Branch, and its completion is expected during the 1978/79 fiscal year.

Employee Benefits Branch

The Employee Benefits Branch administers a comprehensive benefits program for employees of the Ontario Public Service and certain designated agencies, boards and commissions. This responsibility is carried out in accordance with the Public Service Superannuation Act, Superannuation Adjustment Benefits Act, and various insurance plans. The Branch provides a service to the Office of the Assembly in assisting with

a benefits program for Members of the Legislature, in accordance with the Legislative Assembly Retirement Allowances Act and other plans made available to Members.

The Branch is also responsible for clearing contributions from all ministries for the Canadian Pension Plan, Unemployment Insurance Commission and Ontario Health Insurance Plan. Additional functions include liaising with insurance underwriters, participating in the planning and formulation of benefits policy, benefits counselling for current and retired government employees, and providing secretariat services to the Public Service Superannuation Board.

During the year, the Branch introduced and implemented a new, computerized system which provides for the direct deposit of pension payroll cheques into pensioners' bank accounts. In cooperation with the Employee Data Services Branch, this Branch also refined data contained in the Integrated Payroll, Personnel and Employee Benefits System, to facilitate data analysis and the administration of benefits payments. Further reorganization was carried out within the Branch to achieve increased operational efficiencies. Such activity included modernizing document processing systems, designing improved benefit forms, and restructuring staff work schedules.

Government Payments Branch

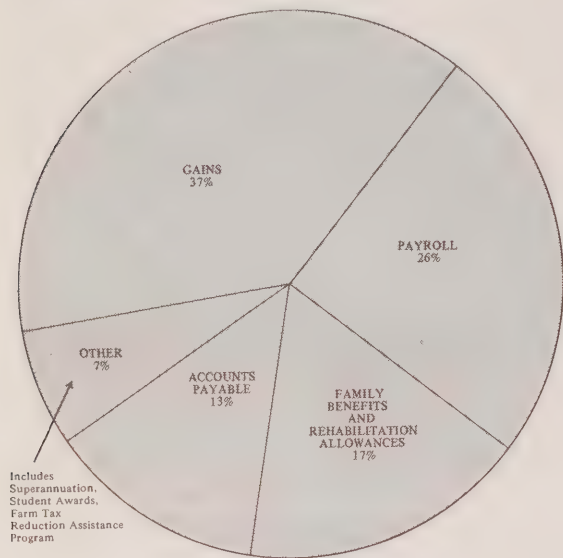

The Government Payments Branch is responsible for administering and recording government payments from the Consolidated Revenue Fund. Branch operations include the conversion of payments information into computer readable form prior to the production of cheques, as well as cheque writing, signing, enveloping and distribution. The Branch also reconciles bank account balances, transfers funds between banks, and provides for the cancellation or replacement of lost or stale dated cheques.

During the year, the Branch processed a total of 8,100,000 cheques for programs including the Ontario Government Payroll, Accounts Payable, Guaranteed Annual Income Supplement Program (GAINS), Family Benefits and Rehabilitation Allowances, Superannuation, Farm Tax Reduction Assistance Program, and Student Awards.

In addition, the Branch implemented a major project to further computerize and standardize its cheque writing and reconciliation systems. The Branch also continued to provide for the input of personnel records and payments data to the Integrated Payroll, Personnel and Employee Benefits System. This conversion service was expanded to include the employee attendance records of several ministries.

GOVERNMENT PAYMENTS BRANCH

8,100,000 cheques processed
during fiscal year
ending March 31, 1978

Employee Data Services Branch

The Employee Data Services Branch operates and maintains the Integrated Payroll, Personnel and Employee Benefits System (IPPEBS), and the Central Attendance Recording System (CARS). These systems are central, computerized sources of Ontario Government employee data which is supplied by the personnel and payroll units of each ministry and agency. They function as bases for the production of most government payroll cheques, and provide for the efficient retrieval of payroll, personnel, employee benefits and employee attendance information required for administrative purposes.

During the year, the Branch introduced a number of refinements to IPPEBS in cooperation with users of the System, providing for increased efficiency in the administration and production of payroll cheques. In addition, the Branch worked in conjunction with several ministries to convert employee attendance information to CARS. The conversion of all ministries to the system was scheduled for completion during the 1978/79 fiscal year.

Telecommunication Services Branch

Telecommunication Services Branch is responsible for providing ministries and agencies with a complete range of telecommunication services which include telephone, data communication, teletype, radio, intercom, facsimile, video transmission, satellite and related communication modes.

Common services provided by the Branch include consolidated telephone systems for Queen's Park and government offices in Metropolitan Toronto, the Court House and Land Registry Office in London, the Barrie Court House, and the Ontario Government Building, Thunder Bay. The Branch also manages the Inter City Network which provides toll free calling between Queen's Park and major government facilities throughout Ontario. On a typical day, the switchboard operators for these common telephone services handled approximately 18,500 calls. Savings in long distance charges and administration costs realized through the use of both services amounted to over \$7 million during the year.

In addition, the Branch continued to manage and coordinate the Ontario Government's Communications Technology Satellite Program. A major activity included teleconferencing experimentation involving the Ministries of Agriculture and Food, Health, Natural Resources, Solicitor General, Transportation and Communications, and Government Services.

Protocol Services Branch

The Protocol Services Branch provides services to ministries and agencies relating to protocol procedures and etiquette, the organization and management of official visits, hospitality functions, ceremonies, public events and government conferences. In addition, the Branch maintains official liaison with fifty-seven foreign government consular posts in Ontario, and on behalf of the federal Department of External Affairs, handles matters pertaining to privileges and immunities accorded to foreign government representatives.

The Branch prepares, records and microfilms formal documents issued under the Great Seal of Ontario and the Privy Seal of the Lieutenant-Governor. It also prepares congratulatory scrolls for presentation to Ontario residents in recognition of ninetieth or succeeding birthdays, fiftieth or succeeding wedding anniversaries, significant individual accomplishments and special jubilees.

During the year the Branch provided a variety of support services as the Ontario Government celebrated the 25th Anniversary of Her Majesty Queen Elizabeth's accession to the throne. Its involvement included organizing six major celebratory events; administering the assemblage of The Queen's Silver Jubilee Art Collection, the provincial gift to Her Majesty; coordinating nominations for Silver Jubilee medals in the public service category; distributing special commemorative medallions to Ontario elementary and secondary school students; and presenting Silver Jubilee badges to Ontario police personnel.

Other Branch activity included coordinating the arrangements for forty-eight official visits to Ontario. These included visits by Their Majesties, the King and Queen of the Belgians, Chancellor Helmut Schmidt of West Germany, Prime Minister Giulio Andreotti of Italy, and Prime Minister Anker Joergensen of Denmark, as well as seventeen ministerial and sixteen ambassadorial visits. The Branch also arranged 120 hospitality functions and thirty-nine public events and assisted in the arrangements for three conferences.

A total of 13,249 formal documents were processed, 15,627 documents of various kinds were recorded and microfilmed for permanent retention by the Branch and 8,534 congratulatory scrolls prepared for presentation to Ontario citizens.

Employee Health Services Branch

The Employee Health Services Branch administers an occupational health program for employees of the Ontario Government through sixteen Health Centres located at Queen's Park and throughout Metropolitan Toronto. These Centres provide emergency and non-emergency medical care services, physical examinations, immunizations, consultation services for personal health problems, health education, and referrals to medical services in the community. The Branch is also responsible for screening new employees for tuberculosis, providing medical treatments for employees with problems related to alcohol and drug addiction, advising management on matters such as the performance of employees with health problems, and maintaining proper hygienic conditions in government facilities.

During the year, there were 69,511 visits by government employees to facilities of the Branch.

Employee Advisory Service

The Employee Advisory Service provides counselling and referral services to Ontario Government employees in cases where alcoholism, drug addiction or other social problems are affecting work performance. It plans and conducts training programs for managers and personnel administrators on effective management approaches to work performance problems, and provides consulting services around specific cases. The Unit also assists employees in obtaining day care for their children.

Insurance and Risk Management

The Insurance and Risk Management Unit administers insurance and risk management programs, purchases insurance for the government, and provides ministries and agencies with expertise to develop, implement and maintain controls over risk exposure and loss prevention.

During the year, the Unit became responsible for the administration of the Ontario Government's travel accident insurance, which was formerly handled by the Employee Benefits Branch. In addition, Unit representatives were participants on a number of government committees discussing insurance and risk management matters.

The Unit continued to utilize tendering procedures to obtain government-wide insurance coverage in order to optimize premium savings in the purchase of general liability and automobile fleet insurance. It also negotiated new policies to provide coverage for individual ministry programs, and initiated further studies to determine whether existing insurance policies could be cancelled in accordance with the Ontario Government's policy to self-insure against risks to physical assets.

Computer Services Systems Development Services Management Consulting Services

Computer Services Division

The Computer Services Division provides computer processing and related services on a charge-back basis, in support of the operational programs and service-delivery functions of ministries and agencies.

The Division consists of three computing centres which are located in Queen's Park, Downsview and Leaside, as well as the Computer Support Services Branch, which is a source of technology planning and computer systems support services.

During the year, the overall processing capacity of the Division was expanded as a result of equipment installations. This activity provided for the continued efficiency and effectiveness of operations, in response to an increased demand for computer services by ministries and agencies. Favourable financial arrangements obtained through the tendering process ensured that the equipment installations took place within allocated funding.

The Computer Support Services Branch, formerly Computer Systems Planning Branch, was renamed in January 1978, to reflect more accurately the nature of its responsibilities.

COMPUTER SERVICES DIVISION
Percentage of revenue by Policy Field

Total revenue — \$20,268,000

Systems Development Services Division

The Systems Development Services Division provided ministries and agencies with a variety of services related to the application of data processing and manual information systems to government operations. These services were designed to facilitate the development and maintenance of effective information systems.

The Division offered services in the areas of computer programming, systems analysis and design, user education, project management and systems maintenance.

During the year, decentralization of the Systems Development Services Division was carried out in accordance with the government decision that services would be more effectively provided through the re-assignment of systems resources to government ministries. The Division ensured that project continuity was provided throughout the decentralization process, which was essentially completed by March 31, 1978.

Management Consulting Services Division

The Management Consulting Services Division provided a wide range of professional consulting services to assist ministries and agencies in solving complex management problems.

Designed to improve the overall public administrative practice within the Ontario Government, services of the Division have been developed to include multi-disciplinary skills and extensive practical management experience. The span of disciplines include business administration, economics, industrial engineering, behavioural sciences, information systems, computer science, operations research, and actuarial science.

Following a complete review of government requirements and consulting resources available in the private sector, the Management Consulting Services Division was discontinued effective September 30, 1977. The Division's actuarial science function was retained as a corporate support service and transferred to the General Services Division.

Accommodation

Accommodation Program

The Accommodation Program provides accommodation facilities for Ontario Government ministries and agencies. This objective is achieved through the provision of a comprehensive range of related services by five Branches – Program Management, Planning and Research, Design Services, Realty Services and Property Management.

Program Management Branch

The Program Management Branch is responsible for the planning, budgeting and scheduling necessary for the effective provision of accommodation facilities for the Ontario Government.

The Branch serves as the prime client liaison with client ministries and coordinates the work of the other Accommodation Branches in implementing accommodation projects related to capital accommodation, land acquisition for capital projects, leasing, lease-purchase and accommodation alterations. The Branch is also responsible for carrying out environmental assessments prior to the start of certain accommodation projects, in accordance with the Environmental Assessment Act.

During the year the Branch coordinated a total of 1,459 different accommodation projects for the various ministries of the government and managed the related funds which totalled approximately \$63,000,000 for the year.

Accommodation Projects Coordinated

– Capital Construction Projects	550
– Lease-Purchase Projects	7
– Accommodation Alteration Projects	671
– New Leases	213
– Land Acquisition for Capital Projects	18
	<u>1,459</u>

Planning and Research Branch

The Planning and Research Branch is responsible for allocating government space to ministries and agencies, and for long-term accommodation planning.

During the year, the Branch implemented accommodation changes for most ministries and agencies, which included consolidating offices of the Ministries of Labour and Consumer and Commercial Relations, in Toronto. Major planning was initiated for office buildings to accommodate the Ministry of Health in

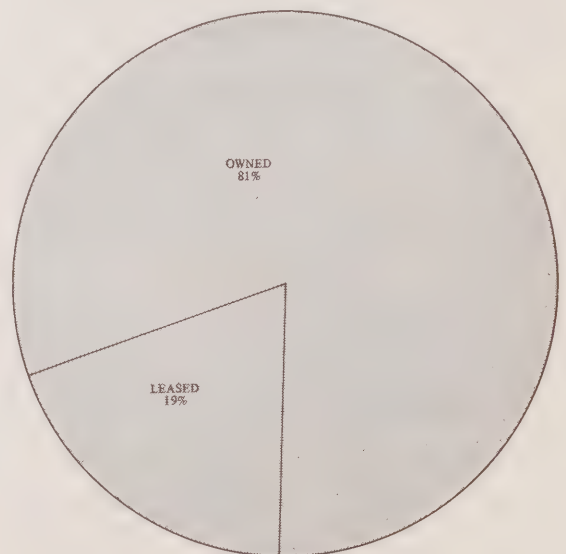

Kingston and the Ministry of Revenue in Oshawa, and planning was completed for proposed court facilities of the Ministry of the Attorney General in Toronto. The Branch also continued to develop plans for consolidated government office buildings in Whitby, Sudbury and Moosonee; and for the relocation of Ministry of Transportation and Communications offices from Queen's Park to Downsview.

Branch research activities included the development of parking reduction plans in accordance with Ontario Government vehicle parking policy, and continuing participation in the development of a computerized government accommodation information system.

Additional activities included reviewing requests for office and special purpose space, surveying ministries for the possible utilization of surplus land, and reviewing government space standards in conjunction with various ministries and the Management Board Secretariat.

GOVERNMENT BUILDINGS LEASED AND OWNED

Total area of buildings – 40,526,600 sq. ft.

Design Services Branch

The Design Services Branch is responsible for the control of all phases of architectural and engineering design, construction supervision, and the provision of furniture and equipment for all accommodation projects of ministries. Design consulting services are provided for other ministries as required, as well as

for the Ministry of Government Services. In addition, the Branch is responsible for carrying out energy audits and updating systems in government-owned buildings to ensure compliance with Ontario Government energy conservation standards.

During the year, the Branch was involved in 77 major projects and 162 minor projects which progressed through various stages of design and construction. These projects represented a total expenditure of \$46,940,000.

A major new project undertaken for the Ministries of the Attorney General and Consumer and Commercial Relations was the construction of court house and registry office facilities in Newmarket. In addition, the construction of court house and registry office facilities continued at Milton, and was completed in Brampton and Kitchener. An addition to the Essex County Court House in Windsor was also initiated for the Ministry of the Attorney General.

Extensive dormitory alterations were started for the Ministry of Correctional Services at the Burtch Correctional Centre, and the provision of an air-tempering system neared completion at the Quinte Detention Centre, Napanee. Completed were Regional Detention Centres at London (one), Toronto (two), and Hamilton (one).

Ministry of Agriculture and Food projects included additions and alterations to the administration building at the Simcoe Research Station and to the feed mill at the Arkell Research Station. At the College of Agricultural Technology, Kemptville, renovations to the Animal Science Building continued, and the construction of gymnasium and auditorium was completed.

Renovations to the kitchen of the Muskoka Centre, Gravenhurst, were started for the Ministry of Community and Social Services. A laundry ventilation system was completed at the Huronia Regional Centre in Orillia, and a ward ventilation system was completed at the Rideau Regional Centre in Smiths Falls.

Projects started for the Ministry of Natural Resources included the construction of district office buildings at Ignace and Midhurst, a fish hatchery station at Dorion, and tree nursery systems at Dryden and Swastika.

Renovations were initiated in the St. Thomas Psychiatric Hospital and the Oakridge security wing of the Mental Health Centre, Penetanguishene, for the Ministry of Health. Phase Three of reconstruction continued at the Queen Street Mental Health Centre in Toronto, as did renovations of the Auchmar Building at the Hamilton Psychiatric Hospital. The

construction of a service corridor was completed at the North Bay Psychiatric Hospital.

Renovations continued at the Ministry of the Environment's laboratory buildings in Etobicoke, and the construction of a Regional Laboratory was completed in Thunder Bay.

In Hawkesbury, a Travel Information Centre was started for the Ministry of Industry and Tourism, and a Student Services Centre was completed for the Ministry of Education at the Sir James Whitney School, Belleville. Also completed were the Ontario Police College in Aylmer, for the Ministry of the Solicitor General; and a District Garage addition for the Ministry of Transportation and Communications in Ottawa.

The construction of an addition to the Health Laboratory was started in Etobicoke, while renovations commenced at the Downsview Computing Centre, and in government buildings at Queen's Park. In addition, the construction of an underground parking garage was finalized at the Convention Centre, Hamilton, as was construction of Ontario Government Buildings in Dryden and Windsor.

Realty Services Branch

The Realty Services Branch provides realty services for most government ministries, including the Ministry of Government Services accommodation program. These services include the appraisal, negotiation and acquisition of land and buildings; land surveys, the leasing of office space, disposal of surplus properties, and the interim management of government-owned properties. The Branch administers the Government Home-Owner Employee Relocation Plan, which is designed to assist employees who, through organizational change are moved from one locality to another at the request of the government. In addition, the Branch provides an advisory service to Boards, Commissions, and Crown Agencies on real estate matters.

During the year, the Branch continued to acquire properties throughout the province for the Ministries of the Environment and Housing, and in the Parkway Belt West for Ontario Hydro and the Ministry of Transportation and Communications. The Branch also continued to provide appraisal and negotiation services to effect the lease of space in all types of accommodation facilities for ministries, Boards and Commissions.

Interim management continued to ensure the effective short term utilization of government-owned properties not immediately required for development.

These included land and buildings in the Parkway Belt West, as well as properties acquired for the Ministry of the Environment, Ontario Housing Corporation and Ontario Land Corporation.

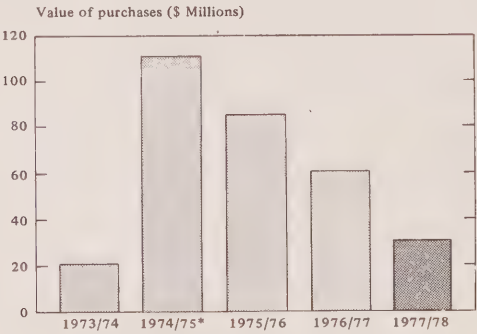

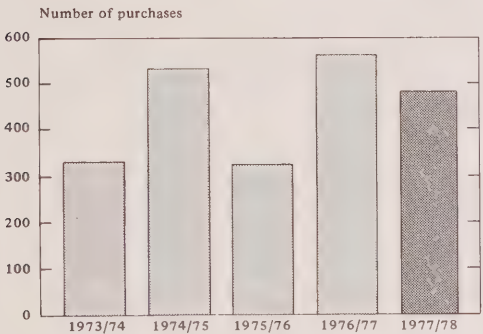

Approximately 1,760 properties were under interim management during the year. A total of 1,477

of these properties were leased by the Branch, providing \$2,858,000 in rental income.

In addition, 498 government employees were assisted through the Government Home-Owner Relocation Plan.

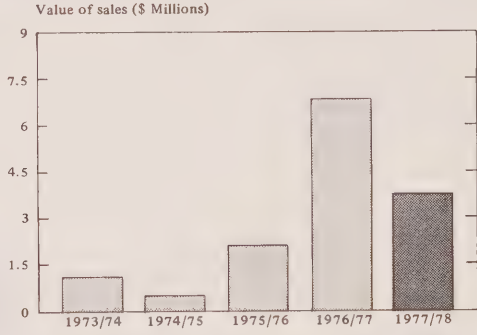

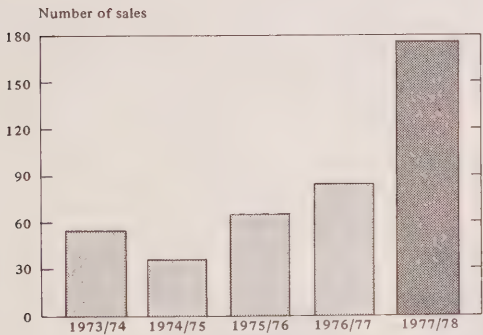

COMPLETED REALTY TRANSACTIONS

PURCHASES

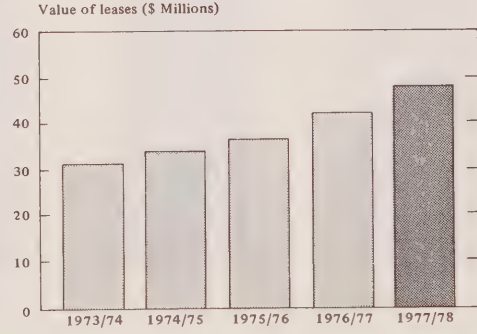

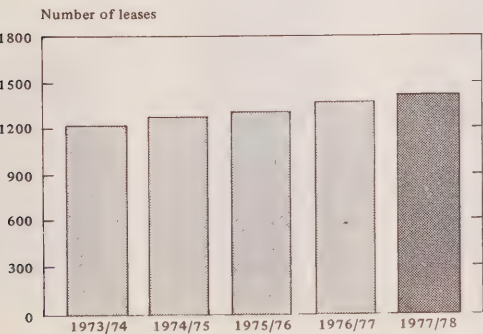

*Increase in purchases during 1974/75 is primarily due to acquisitions for the Parkway Belt West and Government Townsites.

Total	100.0	\$41,158,200

Property Management Branch

The Property Management Branch provides operational maintenance and repair services to government-owned buildings through twelve regional and four field area offices, which are located throughout Ontario.

The Branch is responsible for the servicing and repair of building structures; heating, ventilating, air conditioning and electrical systems; the provision of cleaning, security and grounds maintenance; and common administrative services in consolidated government office buildings.

In addition, the Branch is responsible for the tendering and construction of minor capital projects, as well as alterations and improvements for both leased and government-owned buildings.

Other services include the administration of the Ministry's safety program to ensure safe conditions in government buildings and on building construction sites; coordination of displays by various ministries at the London, Ottawa and Thunder Bay exhibitions; and the tendering and administration of catering contracts for cafeterias and vending machine operations in Provincial Court Houses and office buildings occupied by government ministries.

During the year, the Branch continued its active involvement in a program of energy conservation within Ontario Government buildings.

The net expenditure for the Upkeep of Accommodation Program in the 1977/78 fiscal year was \$57,882,000.
